## What's new in Adobe Reader

Adobe Reader is the keystone of Adobe ePaper® solutions. With powerful new and improved capabilities, Adobe Reader 6 is an essential tool for anyone who needs to view, navigate, browse, or print Adobe PDF documents.

Adobe Reader is now easier to use with an enhanced user interface and includes a How To window for information about using key features. Some Adobe Reader 6 features are only available when you open PDF documents that have additional usage rights assigned by the document creator. These features include Advanced Forms, Comments, and Digital Signatures. When you open a document that includes additional usage rights, the Documents Rights dialog box indicates which features are enabled.

***Note:** Some of these features are only available if you are using the full version of Adobe Reader. To upgrade to the full version of Adobe Reader, choose Help > Updates, and then click Update Adobe Reader Now.*

**Digital signature validation** If someone sends you a PDF document with a digital signature, you can view, print, and verify the signature.

**Security** You can validate certified PDF documents as well as change multimedia security settings for trusted and non-trusted documents.

**Search** With the new Search PDF pane, you can search for specific words or phrases in single or multiple PDF documents, and search PDF documents on the Internet. You can search a document's metadata as well as the document's structure and content, which includes bookmarks and annotations. You can also search PDF documents that contain Chinese, Japanese, and Korean characters. This feature is now available for Mac OS X.

**Forms** Form fields to be filled in are now highlighted so that they are easier to identify. You can add styling formats to text you enter if the author of the PDF form allows it.

**View and print attachments** If the author of the PDF document has attached files or multimedia clips, you can open these attachments and print the file.

**Email PDF files** You can email a PDF document as an attachment from within Adobe Reader.
