

**Content:**

- A. First Steps**
- B. Installation Requirements**
- C. Version History**
- D. Licence Agreement**

**A. First Steps****Have you bought your ASTARTE webEdition License in our online shop?**

After finishing the transaction you saw a confirmation window with the request to print out this confirmation. This print-out provides you with your serial number and your log-in for the customer area of our homepage [www.webedition.de/int](http://www.webedition.de/int).

You can install webEdition on your server only with this serial number. There are no further information or data necessary for installation, you can start immediately after receiving your serial number. You will find the newest version of ASTARTE webEdition for download at <http://www.webedition.de/english/downloads/we.php>. In case you install webEdition without a valid serial number, the demo version will be installed. (No saving of templates allowed).

**Have you bought your ASTARTE webEdition Licence via Fax?**

Your data will be entered in our customer management system by our staff, you will receive two e-mails sent to the address you filled in the fax form. The first mail contains your serial number, the second your log-in for the customer area of our homepage [www.webedition.de/int](http://www.webedition.de/int).

You can install webEdition on your server only with this serial number. There are no further information or data necessary for installation, you can start immediately after receiving your serial number. You will find the newest version of ASTARTE webEdition for download at <http://www.webedition.de/english/downloads/we.php>. In case you install webEdition without a valid serial number, the demo version will be installed. (No saving of templates allowed).

**Where are the modules?**

ASTARTE webEdition are delivered in one single archive file (.zip for Windows or .sit for MAC OS) which contains all modules. During the installation process you have to enter your serial number. In our customer management system is fixed what modules you have bought and your serial number is the key to this record (this is the reason why you have to be online during the installation process). There's no need to download any modules separately!

**How to upgrade a module?**

In case you have bought a new module and would like to upgrade your version of ASTARTE webEdition, you just have to repeat the installation process. During the installation process you choose "module installation" and select the bought module (See Chapter 3.3 in the manual). Your record in our customer management system have been updated after purchasing your module and allows the installation.

**You have lost your serial number?**

Please enter the customer area of our homepage with the log in data provided. There you will find your serial number and an exact record of your system.

**You have lost your log-in data for the customer area?**

Please call: +49(0)721 98554-19

**How to install ASTARTE webEdition?**

You find a comprehensive description of the installation process in Chapter 3 of the webEdition manual. Download at:  
<http://www.webedition.de/deutsch/downloads/we.php>.

**In case it doesn't work at all – where can I find some help?**

The webEdition service hotline is at your service from Monday to Friday from 9:00 up to 18:00 MEZ: +49(0)721 98554-19

**B. Installation Requirements**

- PC (min. Windows 95) or Mac (OS 9.x or OS X) with internet access and CD-ROM drive
- Installation CD-ROM or download version of ASTARTE webEdition
- Web-server or provider with FTP access (with local installation the domain name is "localhost"), PHP4\* and mySQL database
- Own domain (www.domainname.com) or IP-address. A local installation via "localhost" is also possible. Note: webEdition cannot be installed into a subdirectory!
- The web-server (Apache or IIS) needs to have the right to write to the root directory.\*\*
- Needs about 2-5 MB harddisc space; the same amount of harddisc space is required for the mySQL database
- Internet access during installation (the installer supports proxies, but we cannot guarantee full functionality with proxies as there exists no standard for proxies. \*\*\*

\* At present we only guarantee a 100% functionality starting from PHP 4.0.4pl1. The configuration variable "register\_globals" has to be set to "On". This was the standard setting in all versions prior to PHP 4.2. If you use PHP 4.2 you have to set this in the php.ini file (register\_globals = On;). Likewise the configuration variable "allow\_url\_fopen" has to be set to "On" as well! To our knowledge most of the ISPs offer these as standard settings. Furthermore the ISP has to allow PHP-Scripts as executables in any directory; not just within a specific directory (e. g. cgi-bin).

\*\* The Root directory is the directory which holds the index.html (and/or default.htm). In order to be able to install and use webEdition the Webserver has to have the write permission into the Root directory. Many ISPs separate the FTP user and the Webserver in separate accounts (2 different users). Usually the Root directory belongs to the FTP account. In that case the Webserver may not be able to write into the Root directory, unless it has the necessary permissions (chmod 777). If so it is important to disable the "safe\_mode" of PHP during the installation of webEdition. If you do not know how to change these settings please contact your ISP or system administrator.

\*\*\* If this is not possible (because your system is e.g. behind a Firewall or in a private network) please contact us. We have a special webEdition installer ("Firewallinstaller") available. For license reasons this "Firewallinstaller" is only available for registered webEdition customers. If you have any problems with local installation of webEdition please refer to one of the following categories. The assistance is listed by the different operating systems. You'll find the installation instructions and URLs for more detailed assistance. Within our Support you'll find FAQ and Tips & Tricks for the successful installation of webEdition.

## **C. Version History**

### **Important notice for using the formmail tag <we:form type="formmail">**

To avoid spamming, we introduced a new funktion in the edit menu. It is called formmail recipients. You have to define, to what e-mail addresses the formmail should be sent. With a click on the menu option Formmail recipients a window will open. There you can enter the addresses, to which formails could be sent. If no addresses are specified, the formmail function is blocked. In case you have used the formmail function in prior versions of webEdition, you have to enter the addresses which are defined in the template (<we:form type="formmail" ....> under "recipients") in the formmail recipients function.

### **Changes/Bugfixes is Version 2.0.2:**

- The module-intersection was created
- User Management module
- Scheduler module
- Editor Plug-in
- Various small bugs removed
- Backup-function extended
- we:if Tags possible within we:list and we:linklist

## **D. Licence Agreement**

By placing an order for ASTARTE webEdition through our Internet page [www.webedition.de](http://www.webedition.de) you have taken note of and accepted the license agreement. In addition to this, for your information, the license agreement is also included as a PDF document in the files which you download from the Internet or which are included on the CD of the software package.

### **1. Right of use and enjoyment**

ASTARTE shall grant you the simple, non-exclusive right to install and to use the software program (hereinafter known as ASTARTE webEdition) on a (Basic version) five (ASTARTE webEdition FIVE) or twenty (ASTARTE webEdition TWENTY) domains as well as all acquired additional licenses, as well as to allow third parties to use the ASTARTE webEdition installed by you. You will continue to be allowed to assign an installed domain to a third party. This includes passing over the entire risk to the third party. Notification to this effect shall be required by ASTARTE NEW MEDIA AG, so that we can amend the data bank entries. Then one domain shall be subtracted from the number domains to be installed by our customer. Sources (Original download or CD, as well as copies of them) must not be passed on.

### **2. Copyright protection**

ASTARTE webEdition is protected against unauthorized copying by the law on copyright, international agreements and other national laws. You may only make a single copy of ASTARTE webEdition and use it solely as a back-up copy or for archiving purposes. Neither the manual nor any other written material on ASTARTE webEdition may be copied or reproduced by other means without the express and written permission of ASTARTE NEW MEDIA AG.

### **3. Renting, loan, assignment**

You must not rent out, loan or assign ASTARTE webEdition in whole or in part, or copies of it. Nor may licenses may be transferred to third parties. The licensee shall always be the buyer, regardless of any third party rights of use and enjoyment there may be.

### **4. Other restrictions**

As a matter of principle you shall be entitled to modify ASTARTE webEdition or to integrate it into another system. Should such modifications or integration constitute a breach of third party proprietary rights, no claims can be asserted against ASTARTE. Under such circumstances you will have to indemnify ASTARTE against all claims. In addition to which all alterations to the source code as well as all other developments of ASTARTE webEdition shall pass over to the unlimited right of use and enjoyment of ASTARTE. The licensee shall be obliged to notify ASTARTE NEW MEDIA AG of all modifications to the source code of ASTARTE webEdition directly and without delay, and to allow it access to the modifications. All rights– including those to the modified source code shall remain with ASTARTE NEW MEDIA AG.

## **5. Guarantee**

ASTARTE shall give a guarantee for a period of 90 days from the date of invoice that the software will essentially function in accordance with the information in the manual. It should be noted that it is not possible to develop computer programs which are free of defects for all servers – and for all browser conditions. This guarantee is limited to 90 days and shall be given by ASTARTE as manufacturer and shall expressly not apply to missing or faulty product characteristics occurring as a result of using specific browser versions. We recommend Microsoft Internet Explorer, version 5.5 or later.

## **6. Claims under warranty - Remedying defects– Liability for subsequent damage**

Improper treatment or modifications to ASTARTE webEdition shall exempt ASTARTE from any warranty claims whatsoever. Notification shall have to be given straight away of any identified defects, which are not understood by customer service staff or which cannot be rectified by them; in any case such notification shall have to be given within the warranty period.

In the case of an individual adaptation, provided that a product feature was agreed by ASTARTE when it was commissioned, if the end product does not actually have it, it is possible to demand that the defect be remedied.

Moreover, the need for a remedy has to be clarified in each individual case. No fundamental right will be granted for a defect to be remedied.

Notified defects which cannot be traced even with a careful check, or which were not notified straight away shall release ASTARTE from its obligation to remedy the defect.

Compensation claims for damage of all types, including damage as a result of using the software on data, software or hardware, are ruled out. This shall apply in particular to damages caused by lost profit, losses from interruptions to operations, the loss of data or from other financial loss.

Liability for consequential damage is in any case limited to the amount that you actually paid for ASTARTE webEdition.

The liability restrictions shall not apply for warranted qualities and damages that result from intentional or gross negligence by ASTARTE or on a breach of fundamental contractual obligations. The claims based on mandatory statutory product liability rules shall also be unaffected by limitations on liability. ASTARTE advises that the recommendations for the installation and use of ASTARTE webEdition should be read through carefully and adhered to. In addition to this, ASTARTE recommends that back-ups of your application should be created on a regular basis.

## **7. General provisions**

This agreement shall be governed solely by German law. The place of jurisdiction shall be the courts having jurisdiction where ASTARTE is based in Karlsruhe.
