

# The 3D Multimedia Desktop Production Studio

Presenter Professional offers the only genuine 3D multimedia production environment. Everything interacts in three dimensions—sound & audio effects, props, cyber-actors, stages & scenery, live-action & still-image projection, and textured objects—to produce awesome animated sequences with astounding 3D Sound (TrueSound™). Start from the premiere 3D modeling environment to create every physical aspect of your virtual scene, then make a big finish with automated animation effects (TrueAnimation™), 3D-object morphing, and synced, multi-track audio. Simply stated, Presenter Professional is the essential resource for 3D multimedia production.
