POWERBOOK DOCKING STATIONS

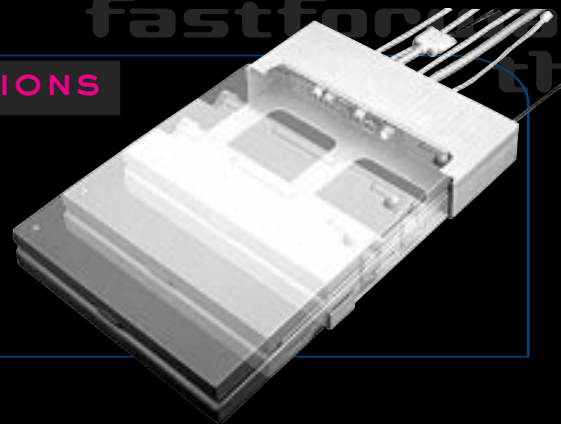

"Where is that #\$\$@%* cable??"

With this new product from Newer Technology, you won't ever have to say that again.

Newer Technology, Inc. is now offering the BookEndz® docking station for the Apple PowerBook computer. This "hero of the tangled cable mess" brings order to an otherwise disorderly situation. BookEndz works with standard PowerBook peripheral cables. It allows you to connect or disconnect a video monitor, network or serial printer, keyboard and mouse, audio in and out, SCSI devices, and power in less than two seconds. Which, by the way, takes less time than saying "#\$\$@%*!"

"How Does This Thing Work?"

The primary purpose of the BookEndz is to make your life easier. It enables you to connect and disconnect with your desktop peripherals quickly and efficiently. By doing so, it effectively converts your PowerBook to a desktop computer, and back again, in two seconds. It installs into the back of your PowerBook, and gives you the ability to turn your PowerBook into a truly portable powerhouse. It allows your PowerBook to connect with scanners, trackballs, networks, printers, modems, or monitors with ease. That means no more cables falling behind your desk. No more connector and port matching. No more delays. And no more compromise. It works, and it works well.

"What Does This Thing Dock With, Anyway?"

Newer Technology's BookEndz docking stations dock with the Apple PowerBook 500 series, the 5000 and 190 series, the 1400 series, the 2400 series, the 3400 series, and the new PowerBook G3 series. Our illustrated installation guide makes the BookEndz installation a snap. The entire, one-time installation, regardless of the model, takes less than three minutes. After that, you can connect or disconnect within a matter of seconds.

"Yeah, But Will It Work For Me?"

It will. We guarantee it.

Over the past 13 years, Newer Technology has emerged as an industry leader in reliable Mac peripherals. The BookEndz docking stations are backed with a two-year limited warranty. We'll even throw in a copy of our Gauge Series performance tools, and a trial copy of SpellTools™ - the universal spell checker and text processing tool. Newer Technology and the BookEndz are working to make your life a whole lot easier.
