

# PhotoAlbum Pro Version 1.1

Version 1.1 for Mac OS 8.1 and Mac OS X  
Released February 2002

## Introduction

Welcome to PhotoAlbum Pro, the easiest way to create great looking web photo albums!  
PhotoAlbum Pro lets you quickly share your images on the web by creating all the html pages, resizing images and creating image thumbnails for you. All you have to do is choose one of the many themes available for your photo album.  
PhotoAlbum Pro can also be used to resize and convert your PICT, TIFF, BMP, GIF, PSD and PNG files into web ready JPEG's!

## Future Updates

We have alot of plans for PhotoAlbum Pro. We will be adding many more features to it soon...  
If you have something you would like to see in the next FREE upgrade of PhotoAlbum Pro, then please e-mail us and we will try to include it in the next release. [requests@realmacs.co.uk](mailto:requests@realmacs.co.uk)

## Register now, It's fast, simple and secure!

**PhotoAlbum Pro is \$10 shareware.** If you use PhotoAlbum Pro then please take the time to register your copy. By registering your copy you are supporting us to make other great Mac only software.  
The easiest and fastest way to register PhotoAlbum Pro online is via our website at: <http://www.realmacs.co.uk>

## Quick 3 step guide to making your first web album.

This will give you a simple step-by-step guide to producing your first photo album. It doesn't give you a list of all the features but will give you a good understanding of the basics...

**Step 1.** Once PhotoAlbum Pro has launched, load in your images by going to the "File" menu and select an "import" option. Select the "Folder" option (command-F) if you wish to import a folder full of images, or select "Image" (command-I) if you wish to just import a single image at a time.

**Step 2.** Under the "image" tab you are presented with a list of options for sizing your image. The default is set to 320x240. If you are not happy with the size simply enter a new one.

**Please note:** You can enter a name and caption for each image in the list by clicking on it and changing the text under the preview on the right hand side of the screen.

**Step 3.** If you would like to change the look and layout of your web album switch to the "webpage" tab. when you are happy with the settings, click the "Export" button (command-S) at the bottom of the screen to create your website. To view your site in a browser locate the file called "index.html". This is the home page of your album.

## What are Cascading Style Sheets?

When you web site is built with PhotoAlbum Pro it creates a file called "styles.css" in the same directory. This file holds all the information on how the text looks within your site. You can simple edit this file to change the colour or size of the text on your website. For more information about css go to <http://www.webmonkey.com>

## Saving the current setup

If you like the way you have set up PhotoAlbum Pro you can save it as the default setup. Go to the "File" menu and select "Save Current Setup" (command-;) Currently PhotoAlbum Pro only saves a limited amout of information about your set-up. In future versions it will save everything,

## Short cut keys

command-B = visit website  
command-D = delete an image from the list.  
command-E = e-mail support  
command-F = import a folder full of images.  
command-H = show Header and Footer HTML options  
command-I = import an image.  
command-N = create a new photo album.  
command-R = order online  
command-S = build and save web album.  
command-U = view & update thumbnail preview.  
command-; = Save current setup  
command-shift-D = delete all images from the list.

## Photo Album Pro FAQ

Q. Why should I register PhotoAlbum Pro?  
A. To get rid of the water mark covering the thumbnail images.

Q. Where can I register PhotoAlbum Pro?

A. Go to <http://www.realmacs.co.uk>

Q. PhotoAlbum Pro sometimes missis some images out when making a webpage?

A. This is because your original image files may be damage. Try opening them in a graphics application and re-saving them. This may also be because of the lack of available memory (in Classic), try quitting all other open applications and expoprtng your webpage again.

Q.PhotoAlbum Pro quits on launch and gives me an error message of "error type 3"

A. You can fix this problem by downloading the latest version of CarbonLib from here:  
<http://asu.info.apple.com/swupdates.nsf/artnum/n11916>

Q: When I try to create a photo album under the classic Mac OS it just quits!

A: This program requires QuickTime and specifically the Still Image Module.

Here is how to install the Still Image and the other Modules.

1. Go to <http://www.apple.com/quicktime> and download quicktime.
2. Run QuickTime Updater / installer.
3. On the QuickTime Install Screen you have three options; Custom, cancel, and update now.
4. Click on custom and you will see QuickTime Still image three from the top.
5. Install QuickTime Still Image.
6. Re-Launch iSlideShow.

#### **Mac OS Classic Users Note**

If you are having trouble with PhotoAlbum Pro you may find it helps to download the latest version of the carbon-lib extension from Apple.

#### **CarbonLib 1.5 for Mac OS 8.6 or higher**

[http://www.versiontracker.com/redir.fcgi/kind=1&db=mac&id=7883/CarbonLib\\_1.5.smi.bin](http://www.versiontracker.com/redir.fcgi/kind=1&db=mac&id=7883/CarbonLib_1.5.smi.bin)

#### **CarbonLib 1.0.4 for Mac OS 8.1**

[http://www.versiontracker.com/redir.fcgi/kind=5&db=mac&id=7883/CarbonLib\\_1.0.4.smi.bin](http://www.versiontracker.com/redir.fcgi/kind=5&db=mac&id=7883/CarbonLib_1.0.4.smi.bin)

#### **System Requirements:**

Mac OS X or System 8.1

CarbonLib 1.5 (classic Mac OS only)

Quicktime 4.0 (classic Mac OS only)

11Mb Ram

- First public release.

#### **About RealMac Software**

RealMac Software was founded in 1999 by Daniel Counsell. He says:

We are a small mac software company concentrating on creating quality shareware for the Macintosh. We try to make programs that aren't just useful or fun, but also look and feel good, since this is something we feel is all too often forgotten in the mac shareware community of today.

Realmac Software distributes its products under the shareware principles: try before you buy and minimal or no marketing costs. As a result shareware costs a fraction of the price of most other commercial software.

**What other people have said about products from RealMac Software:**

NavBar Builder "It's a fantastic program" - Frank van Keeken, Los Angeles, Sep 2001.

NavBar Builder "Your company continues to amaze me with your incredibly creative software" - John Manzione, MacNETv2, July 2001.

Button Builder "Your software is great and inexpensive. Keep up the good work!" - Gianluca Savini, graphic designer and web developer. June 2001

Aquamatic - "Aquamatic is a very simple, but cool product. Thanks for something fun... I used it today to generate a dozen quick Aqua buttons for a technology presentation that was thrust upon me at the last moment." - Marc W. Wolfgram, Senior Software Engineer - Renaissance Learning, Inc, Dec 2000.

Starlands - "this is actually big fun :) After 2 minutes, half of the office was gathered around my desk to watch.. Now I know what I'm going to do tonight ;-)" - Sascha Leib, home user, Nov 2000.
