

Revision History

1.1 The video resolutions list is now sorted from low-rez to hi-rez. Added "Invert Mouse Control" option which was requested by several customers. Previously, moving the mouse right, would move the camera right. Now, moving the mouse right will move the puzzle right (and thus the camera left).

1.0.6 Warns about keyboard issues related to using Quicken Scheduler.

1.0.5 Significant performance increase.

1.0.4 A major bug in QuickTime 7.1 was causing the game to freeze up on launch. A work-around for this QuickTime bug has been installed to fix the problem.

1.0.3 Fixed a minor and rare error message that would appear during startup. Added video config dialog option for doing a VBL sync.

1.0.2 Fixed minor problem when canceling the Save Game dialog during a custom game.

1.0.1 Fixed minor crash bug. Now works on case-sensitive file systems. Improved German localization. Fixed score corruption problem on Intel Macs.

1.0 Initial release.
