1.2 How to use the poke guide

Well, this is really easy peasy...

- Just start ZXAM (the poke guide supports no other emulator).
- Load the game you want to play, but do NOT run it. It is crucial that the emulation has been stopped!

- Go to the poke list and search for the game you have currently loaded. If it is not there, well, bad luck to you... :)
- If you've found it, just move the mouse towards the box and click on it.
- All games marked with a "->" open a sub list. You can select some more different pokes.
- All games marked with a ">" open a sub list with some nice hints.
- Yeah, that was all the hard work. You now just have to start the emulation... :-)

I tried very hard to make no typo while typing all the pokes down...
But - as nobody - i am not perfect at all. It is possible that a poke does not work or even crash your emulated spectrum, since most of the pokes in this list are not checked.

The function of some pokes are not known, too... But i think you will detect their function yourself.

If you have more pokes, better pokes or whatsoever, please feel free to **contact** me...

I'm also looking for comments on the pokes. Do they work?

1.3 Get in contact with me !!!

If you've found some bad pokes, found out the function of the anonymous pokes, have some additions or even new or much better pokes or just want to swap poke lists, PLEEEEEEEZE contact me immediately! This poke guide lives by YOUR help only! The more you help me, the better this guide will be finally!!!

You can contact me, too, if you tested some pokes (even if they did or didn't work)...

But remember: if you want to send me some new pokes, you always have to send the full game name, the poke and its function... I'll include your name into the greetings list! :-)

You can also send me a game you want to have POKES for, and i'll see what i can do... :-)

Well, i just reached my aim to get 500 pokes! YEAH! I even exceeded it by 147 pokes! But i wonder if it is possible to get 800 pokes...

I prefer E-Mails. Send them to:

shred@tfh.dssd.sub.org

I'm reachable via snail mail, too:

Please include a self addressed and stamped envelope if you want to
get a reply...

You can always get the latest version at my support BBS...
