Version History

1.1.1 - 15 April 1998
- Fixed application creator type (coulda sworn I fixed this before!)
- Fixed bug where window title wasn't reflecting group name.
- Fixed bug where too many items in list would cause garbled text.
- Fixed bug that would chop off first character on imported URL's.
- Fixed bug where new groups could not be opened once closed.

1.1.0 - 17 February 1998
- Fixed Open Transport dependency problem.
- Fixed blank status icon when adding new web page.
- Fixed restoring window sizes & positions.
- "Page modified" icon now reflects current browser selection.
- Changed storage of groups and items to simplify future expansion.
- Extended preferences options.
- Added 'skip re-checking new' feature.
- Added date & time of last visit or update to pages.
- Fixed bug that prevented deletion of groups.
- Fixed bug in "Mark as 'visited'" function that wouldn't make changes permanent.
- Fixed bug in "Mark as 'updated'" function - didn't work at all.
- Added 'Save' to file menu (data normally saved at exit or after checking).
- Launch, Add page, and close menu options only available when window open.
- Changed creator type to prevent conflict with MacWebCamera.
- Updated grayscale appearance.
- Updated internet functions for more reliability and better performance.
- Added "Check all groups" menu option.

1.0.1 - 15 May 1997
 - Fixed compatibility problem when running the PowerPC version with "classic" Mac TCP/IP.
- Fixed "Mac the Knife" URL in default group.

1.0.0 - 12 May 1997
 - First release.
