

WARNING: Corrupted GIF files will crash QuickTime 2.5!

Please install QuickTime 3.0 (but keep your old MoviePlayer). QuickTime 3.0 corrects this problem as well as providing support for wide GIFs, layered Photoshop, progressive JPEG, TIFF, PNG, Targa, and BMP. Available from <<http://www.quicktime.apple.com/>>

See the Known Bugs section of the QuickNailer Help window for further details.

(Please e-mail us if this application crashes your computer. We want our software to work correctly no matter what system or computer you are using. Choose About QuickNailer from the application's Apple menu and click the Bug Report button.)
