\*XYBOTS:

On the high score table, enter "ALF". Now when you start to play the next game you will have infinite lives and near invincibility.

If you manage to reach level 10, you're better off using your radar to kill the xybots. Just line them up using radar and fire, you don't have to be able to see them. Keep as many keys with you as possible because some levels don't have enough to complete them.

There are short cuts to level seven on levels one and four - you get extra cash for using them. If you have the extra energy upgrade try not to let your energy fall below 100m, because you lose the upgrade if it does.

Drums are not just decorations - hide behind them when possible and use your zapper near to them to find more cannon power.

On level eight, near to the top left hand transporter you can get to two white coins by blasting away one of the three walls around them.

Don't split up in the two-player game, because it's easier to complete it together.

The master xybot lives on level 11, and you'll need to stock up on double shot and extra shot speed to stand a chance of survival.

Try to get one xybot to stand behind another - they'll blow each other apart.

X-OUT:

On the equipment screen select the white bug ship and put it on the grid area. Then choose the orange laser and drag it to the face of the shop keeper. Keep clicking the LEFT MOUSE BUTTON until you get \$500,000.

Insert the disk, and hold both mousebuttons until the title screen

appears. When youre in the shop hold down 'HELP' and 'DEL' for a few seconds, now choose your ships as normal, but you have infinite energy.

To get more cash at the beginning of the game, select the smallest ship (the one at the top), then the weediest laser (the orange one with single beam), and place it on the shopkeepers nose. Hit the fire button to get the cash boost!
