# Chapter 1

## Default

### 1.1 Insert Several V1.00e for Finalwriter

»Insert Several V1.00e«

is an ARExx-Script for Finalwriter to copy and insert no end of objects (grouped or ungrouped) in a few seconds.  
The copies you can displace and/or rotate.

Installation

How to use

Author

History

Future

Sorry, for my bad english. If you want, you can translate my german guide and send to me. You can find the german guide in the Aminet.

biz/swood/fw\_mef.lha

Thanks.

### 1.2 Installation

---

1. Copy »ISeveral.fw« in your FWMacros-Drawer.
2. Start programm »RexxMast«.
3. Start »Finalwriter«.
4. Open menu "User - Other - Preferences...".

- \* "Action" - New
- \* "Name of menu" - ISeveral
- \* "Command" - "Type" - ARexx-Script
- \* "Command" - "Select" (ISeveral.fw)
- \* "HotKey" - F9
- \* "Accept"
- \* "Save"

### 1.3 How to use

Select the object(s) which you want to copy.

Start the macro with the Shortcut (F9).  
Input the number of copies, horizontal and vertical displacement and the rotation.

Thats all.

Examples you can find in »FW\_ISeveral-Doc.fw«.  
Load this document in your FW-Program.

PS: You cant rotate one line. There are problems in the  
FW-ARexx commands.

### 1.4 Author

Send improvements, tips or other problems with Finalwriter to me.
