

# Crashing

One of the first things you will probably do is crash. There are two ways to do this. Spinning into walls or getting hit by exploding things.

If you hit an obstacle which causes you to lose control, you

will spin around. Hitting a wall while you are spinning will

cause you to crash.

Cars that have picked up the smiley face will cause you to spin out of control when they hit you. Of course, what comes around goes around. You will certainly have the opportunity to repay them.

If you are hit by a rocket or bomb, you will explode.

Crashing causes a time delay, so it is a good idea to encourage your opponents to crash as often as possible. They will do the same for you.
