# German-Spanish Dictionary.

## Introduction.

The German-Spanish Dictionary is a module for the 'Verbs & Nouns' and 'Verbs&Nouns Lookup' programs. It is a small dictionary of about 7500 German words. Your input to this dictionary is greatly appreciated - the dictionary is free. It will be useful to Spanish native speakers who are learning German and to German speakers who are learning Spanish.

The 'Verbs & Nouns' application allows you to add new entries and modify the existing entries, to add comments to every word, search for the German word or its Spanish translation, and do translation exercises. You can download the latest version of 'Verbs & Nouns' and 'Verbs&Nouns Lookup' from my home-page at:   http://users.netmatters.co.uk/dandaforbes

## Using the German-Spanish Dictionary with 'Verbs & Nouns'.

You can use this application to browse the dictionary, modify it, add new entries, and to do translation exercises. The picture below explains some of the possibilities.

ou can practise translation from German to Spanish and the reverse:

ou can enter alternative answers (one answer per box). Wrong answers are marked red. You can also do translation quizzes where you have to choose the correct answer from the list of 'guesses'.

lease refer to 'Verbs & Nouns' Read Me file to get more information about other possibilities. The example of a useful feature is possibility to paste any German text from the clipboard into the Word Group (inside the Browse window). The program will add all words included in the dictionary that are present in the text passage. If you want to omit certain words (for instance most commonly used words) you can specify the 'omission group' (in the Groups Builder window).

## Disclaimer.

This software is distributed in the hope that it will be useful, but without any warranty of any kind, and without even the implied warranty of merchantability or fitness for a particular purpose.   In no event unless agreed to in writing will the copyright holders, or any other party who may redistribute the software, be liable to you for damages, including any general, special, incidental or consequential damage arising out of the use or inability to use the module (including but not limited to loss of data or data being rendered inaccurate or losses sustained by you or third parties or a failure of the software to operate with any other software), even if such holder or other party has been advised of the possibility of such damage.

## Comments.

If you have questions, comments or you would like to share your new entries with other users then please send me an e-mail.
