The progress window:

You will get the "Progress Window" (See Figure 1) when you import, export, delete multiple items, play a sound or speak text. You can cancel the operation by hitting Command-. (period) or by clicking the "Stop" button at any time. Any time the progress window is in front, you can send ScrapIt Pro to the background and go on to a task in another application if you like.

igure 1 - Progress Window
