1.2 Description

F1GPPalette.pprx is an ARexx for use with PPaint 7.

It's pretty simple. All it does is to reduce the current image to less than 32 colours, reorders the palette and then inserts FlGP's default colours which are used to render the menus in the game.

You will need to use FlGP-Ed to convert the images into the format required by FlGP before you can use them in the game as backdrops.

1.3 Installation & Usage

Installation is very simple. Just copy the FlGPPalette.pprx to PPaint:Rexx/

Run the script from within PPaint using the toolbar.

1.4 Distribution Conditions

Majordomo_approve.thor is freely distributable, but the copyright ↔
remains
with the
author
.

- (1) None of the distributed files are changed in any way
- (2) It is not sold for profit and it is not included on any disks that are sold solely for profit (includes magazine coverdisks)
- (3) The distribution contents remain complete (see list below)

If this software is to be sold for profit, permission must be obtained from me, the
author
.

Both Aminet and Amiga Format have been granted permission to distribute this software on their CDs.

The following files must be present in their original and unchanged form in any copies of this software:

The latest version of this script can be found on my homepage:

<http://www.nanunanu.org/~oliver/>

I'm also the author of FlGP-Ed and maintain several World Wide Web pages on the Internet. These include a page dedicated to this datatype where the latest version can be found. The Amiga Formula One Homepage provides just about everything available to Amiga FlGP players including WWW pages FlGP Hall of Fame and the Internet FlGP Championship. There's information on all of the Amiga FlGP utilities (available for downloading too) as well as lots of other goodies and other Amiga / Formula One related links. So, for an Amiga FlGP junkie's dream, set your web browser to:
