Creating new Catalogfiles for ME#?

This is a short introduction to create new Catalogfiles for the ME#? Programs.

When you translate the CD-File please insert for the Gadget-Key upper-char, because the test which key is pressed works with upper-char (bclr #5,d0). Only Gadgets with two ways (Listview- and Cyclegadgets) becomes a lower-char.

OK?!

e.g.

\_Button -> Key B (normal Button)

\_Liste -> Key l (Listview)
