Chapter 1

NapalmNI_ger

1.1 Welcome to my NewIcon-Set for Napalm - The Crimson Crisis

Napalm NewIcon Set

Version 1.00

Copyright ©1998 M.Fabian

About / What for?

What do I need?

How to install...

Missing something?

1.2 What the heck is that fucking stuff??

Who done it?

=====

What? The game? Formerly known as Diversia...

www.vadium.sk/ablaze/

by Ablaze Entertainment. They released the game "Strangers"
last year.

This Compilation

=====

This NewIcon-Compilation was done by Actinic (myself) using

various graphixs from various sources. I don't remember all!

Visit "The World Of Goigo" by typing:

www.goigo.com

in ya browser.

What is it?

=====

Napalm - The Crimson Crisis @1998 by clickBOOM

A Command & Conquer like game for ya Amiga-Computer!
Long awaited... so order it now... pirating such
cool games is extremely un-cool! It's worth buying
and gaming it!

look here:

www.clickboom.com

1.3 NewIconV4.x must be installed!

What do I have installed on my Amiga?

=====

It is necessary to have a complete installation of NewIconV4.x on your system!
MagicWB suxx!!!! Not enough colors and always looks "schrottig"! Sorry, I am
an NewIcon-Fan and was never a friend of the MagicWB-stuff...

Your WB must have at least 256 Colors, because most of the Quake-Icons contain
an own palette (32 to 256 colors). The best choice is TrueColor!

NewIcon? Never heard?!?!?

=====

Your own fault! > Aminet: searchstring "newicon" and you'll receive a vast
load of stuff.

1.4 Icon-Install? Which tool?

What's the best tool to install?

I prefer the tool "IconInstallerV3.x"! Just drag & drop the icons... much comfortable against to some Win95-Tools, who needs about 28 steps to change the hd-icon..... hahraharhar (was an article in a german computer-magazin)

1.5 Ideas!

Hey! You have an idea for a new icon? Or you have a picture an no knowledge to convert it to the newicon-format?

feel free to send it to me for the next release...
