1.6 What is it?

what is it?

Super Anagram Solver II is a simple MUI program which will find words out of a given anagram very quickly by scanning the entire English dictionary for any matches. This program is good for solving anagram puzzles found in newspapers, magazines and puzzle books. It also helps you cheat at scrabble!

1.7 Usage

usage

1. Entering & Solving an anagram

To use Super Anagram Solver II, simply type in your anagram in the text entry box on the 'Search page' and click 'Solve!' to scan to solve the anagram. If at anytime you wish to abort the solve operation - click the 'Stop' gadget.

Once your anagram has been solved you can then save or print your results by clicking on the 'Save' and 'Print' gadgets.

2. Options

= 2 Chrs will find words out of the anagram which are two or more characters in size, and so on.

= Match Length will only find words which match the anagrams length.

= Check Word searches the English dictionary to see if the word is present.

= Use letters will cause Anagram Solver to only find words which contain the characters specified.
