1.2 Introduction

VolChange 1.0+

15-Aug-1999

Are you frustrated to start your favourite tool when a new disk

like floppy, cd, or other changable media is inserted?

Would you like to execute a program when a specific media is inserted?

Here is a simple solution - VolChange. VolChange tracks all DISK_INSERTED or DISK_REMOVED events and can start any program if a disk is inserted or removed.

Requirements:

Computer : Any Amiga
Kickstart & WB : 3.0 +

1.3 Installation

VolChange 1.0+

15-Aug-1999

The installation is very simple. I think, that I don't need the Installer for these file. The VolChange program should be copied to the WBStartup directory which is the best place for it.

It's designed as a commodity with a default built in hotkey lalt+v but you can define your own popup key by using the tooltype CX_POPKEY. Also CX_POPUP and CX_PRIORITY are supported. You can control the program with Exchange very easy.

When you press the hotkey or use the Exchange action "show" the VolChange window pops up. More about the setup you can read on the next page.

1.4 Usage - Page 1

VolChange 1.0+

15-Aug-1999

After the program is started it reads the DosList to get all currently present volumes. They will be displayed in the listview on the left.

Below the list is a gadget where you can change the volume name to be scanned. It's important if you want to use an '*' as wildcard character to perform an action on all volumes starting with the same string.

Ignore -----

This button moves a volume from the watch list to the ignore list. This is useful for volumes like 'DH0' or other static media. It helps to keep the watchlist a little bit more clearly.

Reread -----

Use this button if you want to reread the volume list. This option is used not very often because all new media are automatically added to the watch list.

Delete -----

Delete an entry in the watch or ignore list.

Show -----

Here you can switch between the current volume list and the hidden volume list.

1.5 Usage - Page 2

VolChange 1.0+

15-Aug-1999

Entry Active -----

If you want to deactivate an entry in the watch list just uncheck this gadget.

Insert Action -----

This string gadget holds the command that should be executed when the assigned volume is inserted. Please use run if you want to start it in the background, otherwise VolChange is waiting for the program end.

If you use %iv in the command string it will be replaced with the name of the last inserted volume. This name you can also find in the ENV-Variable \$ivolume.

Remove Action -----

And here you can enter the command that should be executed if the assigned volume is removed. Very easy, eh?

Save -----

Save the preferences file in ENVARC:. This will also be done if you quit the program or after the registration.

Also all entries in the ignore list are saved. Entries in the watch list are only saved if at least one of the action command strings is not empty regardless of the "Entry Active" gadget.

1.6 History and Future of VolChange

VolChange 1.0+

15-Aug-1999

(A)dded (R)emoved (F)ixed (I)nfo

```
V 1.0 ..... 07-Feb-1999 (A) .... Initial release
V 1.01 ..... 11-Feb 1999 (A) .... Volume patterns

Future -----

- I'm waiting for your suggestions.

1.7 Registration

VolChange 1.0+

15-Aug-1999

This program is shareware but not limited in any function. If you like it and use it every day then I would think it's a good idea to register.

The small shareware registration fee keeps my Amiga alive and

guarantees you my support.

Send me an email with your first and last name and I'll send you back your serial number. Use the menu item register to enter your name and your personal serial number, that's all.

This program cost: DEM 10.00
 USD 5.00
 CAD 8.00

My bank account for German users:

Norisbank
BLZ: 760 260 00
KTO: 449 816 400 0

All other can send me cash, a check, or money orders.

1.8 Copyright and contact

VolChange 1.0+

15-Aug-1999

You are allowed to copy VolChange as long as you do not charge more than the price for the medium (and maybe a small copying fee).

You are allowed to put it on a collection of Public Domain/Freeware/Shareware programs, if you send me a free copy of it. (If you put it on a cover disk of a disk magazine, then please send me the corresponding issue of this magazine, too.)

Use it at your own risk ! I can give you no warranty. I am no responsible for anything that happens, especially if it is something bad.

If you found any bugs or have important suggestions or improvements, send all to:
