1.2 OpusNIbar · Introduction

```
.....
WHAT IS OPUSNIBAR?
.....
```

OpusNIbar is a set of NewIcons for use with the toolbar in Directory Opus 5.5 or higher.

Why another pack of Toolbar icons?

I was looking for toolbar icons on Aminet, but I didn't like the look of any of them.

So I felt like doing something about this, and this is the result - 146 fresh, clean

and colorful icons, all for free.

Enjoy!

1.3 OpusNlbar · Requirements

.....
REQUIREMENTS FOR OPUSNIBAR.
.....

Required:

- An Amiga with AmigaOS 2.04+
- Directory Opus 5.5 or higher.
- NewIcons installed.

Recommended (but not required):

- AmigaOS 3.0+
- 32 Colors or more on screen (GFX Card).
- A display mode with square (1:1) pixels.
- The faster Amiga the better.

1.4 OpusNlbar · Installation

.....
THE INSTALLATION OF OPUSNIBAR.
.....

This is quite easy, just copy the 'images' drawer to anywhere you like, you'll probably like it to be inside the Dopus5: drawer.

NOTE!

The 'ToolBarArrow.image' needs to be in Dopus5:Images/. Opus doesn't support it in Icon-format, so it has to be an AnimBrush.

1.6 OpusNlbar - The Author

.....
THE AUTHOR
.....

Name: Kim Lemon
Born: 1978, Nov 21
Location: SWEDEN

About my dorky self:

My hobbies are Party, Shows, Web Design, Art,
Paint, Guitar, Music - indie & punk shit.

I'm also addicted to the good old Commodore 64.
My favorite candies are PEZ, and I collect them.
(not the candies, but you know...)

I would best describe myself as Warmhearted,
Shy, Creative, Funny, Caring... or something.

Other Thoughts:

If you use these icons I would be very happy
if emailed me and told me what's good or bad
about them. Any comments are appreciated.

P.S. This is my first AmigaGuide ever, and
I'm kinda surprised how deadly easy it was
learning it within just a few minutes. :)
