Puzzle v1.1

There have been several improvements to Puzzle over version 1.0, most notably the ability to load images from bitmap files (for example, 'chess.bmp', or any of the other wallpaper bitmaps), an improved help system, and lower memory requirements. Please take a look at the new version.

To install Puzzle, simply copy the 'puzzle.exe' and 'puzzle.hlp' files. Puzzle expects the help file, 'puzzle.hlp', to either be located in the same directory as 'puzzle.exe', or where the other Windows Help files are stored.
