

# Ticker Tape

## Overview

Creates a Ticker Tape (scrolling text) display in either the browser's statusbar or a text input box (which can be placed anywhere within the document).

## Browser Compatibility

- Works fully in Netscape Navigator 2.01 and higher
- Works fully in Microsoft Internet Explorer 3.0 and higher
- No errors should occur in old browsers but text box will be blank

## Troubleshooting

- Do not put more than one Ticker tape in a given document
- Do not use a quote (the character ") in the message because it will cause an error in the browser.
- Make sure your document has a head tag (<head>....</head>) or else Java Script It! will not be able to insert the java script code.
