Readme File for MoneyGo.Exe

Unzip the MoneyGo.Zip file anywhere on your hard disk and make sure that you have the file VBRUN300.DLL, which is required to run a program written in Visual Basic Ver. 3.0. It must be in you Windows or Windows\Systems directory.

Create a new icon for it by selecting FILE then NEW from your program manager. In the dialog box select PROGRAM ITEM and hit OK. Type MoneyGo in the "Description" box, the path plus MONEYGO.EXE in the "Command Line" box (ex. c:\moneygo\moneygo.exe), and the directory the program is stored in, in the "Working Directory" box. Hit OK and the icon will appear in the active window. Double-click the MoneyGo icon to start and go to HELP CONTENTS to learn how to use the program.

This isn't a big program. I created it because I needed a quick and easy way to check on my accounts, account numbers, and balances. I figued, if I need something like this so bad that I would go through all the trouble of programming one, maybe someone else would have a need for it.

It isn't exactly rich with features, but if you can think of some things that I could do to improve MoneyGo, I will certainly try to include them in future upgrades. I can be contacted at the address at the bottom of the file.

If you like MoneyGo and would like to see it grow, please send $5.00 to the address below. I wasn't going to ask for a fee at first, but I wanted to know how many people are using the program, how many like it, and what kind of improvements I could make to it. I figuered 5 bucks isn't a whole heck of a lot of money, and some people wouldn't mind paying that to help me in my quest for information.
