

| INDEX,C,10 | LINE,C,65   | REF,C,10 |
|------------|---|----------|
| SIZE       | SIZING creates the dimensions of a label. Pressing the ENTER key  |          |
| SIZE       | lets you use the right arrow key to widen the label and the down  |          |
| SIZE       | arrow key to heighten the label. The reverse is true, the left    |          |
| SIZE       | arrow key decreases the width and the up arrow key decreases the  |          |
| SIZE       | height. In the upper right hand corner you get the dimensions of  |          |
| SIZE       | the label both in inches and in characters/lines. Adjustment can  |          |
| SIZE       | also be done using OPTIONS and placing lines between each label.  |          |
| TEXT       | TEXT allows to freely type text on the label. After Pressing the  |          |
| TEXT       | enter key you can start typeing. All EDITING keys are active. You |          |
| TEXT       | can type over text when the INSERT is off, (TOP RIGHT BOX), or    |          |
| TEXT       | insert between text with INSERT on. Depressing ENTER key puts you |          |
| TEXT       | at the next line, and the up arrow key brings you up one line.    |          |
| TEXT       | The left/right keys move cursor and the backspace key erases a    |          |
| TEXT       | previous character. Page down would enter the whole label.        |          |
| MODIFY     | MODIFY: The command modify let's you select a line on the label   |          |
| MODIFY     | in order to change or modify previously typed text.               |          |
| MODIFY     | Use the down arrow key will move highlight bar down to the next   |          |
| MODIFY     | line. The up arrow key will bring highlight bar up one line. Use  |          |
| MODIFY     | the arrow keys to select the desired line you want to change.     |          |
| MODIFY     | When you have the highlight bar on the line you wish to change,   |          |
| MODIFY     | Press the enter key. (Note, read the instructions at the bottom   |          |
| MODIFY     | window). Type over your text or use the editing keys to adjust    |          |
| MODIFY     | text. You can put INSERT on and space or delete to move whole     |          |
| MODIFY     | line, right or left. Pressing ENTER brings you back to using the  |          |
| MODIFY     | up/down cursor keys, or right/left keys to exit!                  |          |
| OPTIONS    | OPTIONS: Options lets you set up a label for various tasks, such  |          |
| OPTIONS    | as being able to pause between printing, (This is used mainly for |          |
| OPTIONS    | envelopes), also you can tab right to center the printing on the  |          |
| OPTIONS    | envelope. The one option probably most used will be the LINE      |          |
| OPTIONS    | SPACE between labels as this allows more lines between each label |          |
| OPTIONS    | and is good for adjustments. The default is 1. We hope to have    |          |
| OPTIONS    | an option for doing 2,3,and 4 across labels in our next version.  |          |
| OPTIONS    | *Note, instructions will always be in bottom window.              |          |
| PRINT      | PRINT: Pressing the ENTER key at the print option will give you   |          |
| PRINT      | a window and ask you the number of copies to print. When testing  |          |
| PRINT      | you can do 2 or 3 first. When you have the setup right then you   |          |
| PRINT      | can do your regular run. (*NOTE: Esc to abort printing is not     |          |
| PRINT      | installed in version 1.0, but will be in next release.            |          |
| LIBR       | LIBRARY: After making a label you may want to save it for future  |          |
| LIBR       | use. To do this use the Libr. option on the main menu, after      |          |
| LIBR       | creating and running a sucessful label, Press ENTER key on Libr.  |          |
| LIBR       | and select ADD using the right/left cursor keys. You can type     |          |
| LIBR       | a description and what kind of labels used. Later you can recall  |          |
| LIBR       | the label by using the selecting a format using the up/down keys  |          |
| LIBR       | under the option of recall in the library.                        |          |
| CLEAR      | CLEAR: Clear will let you clear a working label, this does not    |          |
| CLEAR      | affect the contents of a library. you may just want to clear a    |          |
| CLEAR      | label and start fresh. Remember however that unless first saved   |          |

Sheet1

|           |  |         |
|-----------|--|---------|
| CLEAR     | to the library this option will erase working label, and you will  |         |
| CLEAR     | have to start again.   |         |
| QUIT      | QUIT: Pressing ENTER at quit will ask you to confirm leaving the   |         |
| QUIT      | labelcmt program, press (Y) to exit, any other key will return     |         |
| QUIT      | you back to the program.   |         |
| CMT       | CMT: This option will describe our other products that we          |         |
| CMT       | make and a screen of what the program looks like. After pressing   |         |
| CMT       | the ENTER key at (cmt) you will be at screen 1. Press the letter   |         |
| CMT       | (N) for the next screen, (P) for the previous screen, or (Q) to    |         |
| CMT       | quit the (cmt) option. Note: The last screen will let you type     |         |
| CMT       | a registration form and will print it for you.                     |         |

| HELP      | HELP: The CMT manual will be integrated into all CMT applications  |         |
| HELP      | and programs. Eventually we will have a seperate manual for        |         |
| HELP      | all cmt programs and applications.                                 |         |
| HELP      | USING CMT MANUAL : You access the CMT Manual by Pressing the <f1>  |         |
| HELP      | key. The program will then look at what you                        |         |
| HELP      | are currently doing and go to that section of                      |         |
| INDEX     | TEXT.....: ENTERING TEXT ON LABEL.                                 | TEXT    |

| COPYRIGHT | copy and distribution of this program. Remember this program is    |         |
| COPYRIGHT | shareware and is not for public domain. If you find it of use,     |         |
| COPYRIGHT | then you are required to pay for it by sending in \$20.00 made out |         |
| COPYRIGHT | to CMT. If you do not find it of use please pass it to a friend.   |         |
| HELP      | of the manual that is needed.                                      |         |
| HELP      | VERSION 1.0 : The CMT Manual for this application is not yet       |         |
| HELP      | Finished, we are currently still working on it.                    |         |
| HELP      | INSTRUCTIONS: After pressing the <f1> key the text relating to     |         |
| HELP      | your current job will be displayed. You now however can view       |         |
| HELP      | any part of the manual. If you need the SUBJECT-INDEX you can      |         |
| HELP      | do this either of two ways. The fastest is pressing the (I) key    |         |
| HELP      | for the SUBJECT-INDEX, or you can press the familiar left/right    |         |
| HELP      | arrow keys which will scroll each CMT Manual option, Pressing      |         |

Sheet1

|           |  |
|-----------|--|
| HELP      | the ENTER key at the highlighted option of INDEX will also give        |
| HELP      | you the CMT Manual's subject-index.                                    |
| EDITING   | EDITING: Editing in our terminology means that the INSERT, DELETE      |
| EDITING   | HOME, END, PAGE UP, PAGE DOWN keys are active.                         |
| EDITING   | USE: When using the MODIFY or TEXT option you normally would just      |
| EDITING   | type over the text previously written. However you may want to         |
| EDITING   | move all the text on one line over 1 space. You can type over the      |
| EDITING   | text or you can Press the INSERT key on you're numeric or cursor       |
| EDITING   | keypad. <INSERT> should display in the top right hand corner of INSERT |
| EDITING   | the screen. You can now press the space bar and one space will be      |
| EDITING   | inserted before the text, moving it over on space.                     |
| INSERT    | <INSERT> Pressing the Insert key on you numeric keypad will place      |
| INSERT    | insert on, pressing a second time will take insert off.                |
