ZodiacSigns™ - The Personal Astrology Planner™
For DOS

For centuries, man has looked to the stars for clues to life and the future. Around the world today, millions of people read their horoscope to chart their destiny. And now, astrology enters the computer age with **ZodiacSigns™**, a colorful, easy-to-use program that lets you create a personalized astrological plan.

From Sagittarius to Scorpio, Libra to Leo, all the signs of the Zodiac along with the sun, moon and planets are at your fingertips.

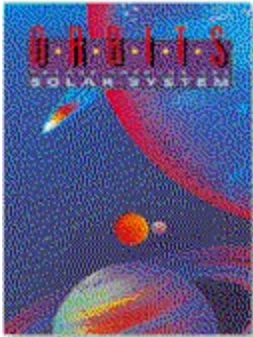

- Set up your birth horoscope by finding the position of the heavens at the time you were born
- Design composite horoscopes for you and your friends
- Create special horoscopes including solar, lunar, and ancient Chaldean charts
- Project your horoscope for a specific date or time frame

ZodiacSigns™ will even let you check your biorhythms. Best of all, you can print out your entire astrological chart along with an exact evaluation of your horoscope. Discover **ZodiacSigns™ - Your Personal Astrology Planner™**...and find out what's in the stars for you!

System Requirements:

IBM PC or compatible
512k available RAM
PC/MS DOS 3.2 or later
EGA or VGA display
1.5MB available hard disk space
Microsoft or compatible mouse required

Orbits™ - Voyage Through The Solar System™
For DOS

The rings of Saturn, the mountains of the moon, the core of the sun . . . far beyond our world, incredible wonders fill the heavens. And now they are as close as your PC screen with ***Orbits™ - Voyage Through The Solar System™***.

An interactive space simulator and atlas of the solar system, ***Orbits™*** transforms science fiction fantasy into dazzling reality.

As a futuristic astronaut, you'll journey to all the planets, studying actual satellite photographs from NASA and the Jet Propulsion Laboratory, exploring their internal structures and weighing the difference in gravity. You'll venture inside the sun, watching atomic particles collide in the ultimate nuclear reactor.

- Colorful animation and 3-D graphics allow you to witness lunar and solar eclipses, follow the clockwork motion of the solar system, and more
- With Orbit-Trek, an Earth-Orbit satellite simulator, you can deploy satellites, run space intercept missions, and rendezvous with cosmic probes
- A great educational tool, ***Orbits™*** is also an entertaining way to spend some time with your PC.

Embark on a galactic adventure with ***Orbits™***, your voyage through the solar system.

System Requirements:

- IBM PC or compatible
- 512k available RAM
- PC/MS DOS 2.0 or above
- 2MB available hard disk space
- EGA or VGA color display
- 5.25" or 3.5" floppy disk drive
- Microsoft or compatible mouse (optional)

B.A.B.Y.TM - Birth And Baby YearsTM
For DOS

Celebrate the miracle of life with ***B.A.B.Y.TM - Birth And Baby YearsTM*** - a computerized guide that leads you from pre-pregnancy to after your child is born. This unique software package allows you to enter all facts and figures concerning your baby, such as birth statistics and emergency information.
