*BAAL (Psyclapse):

    Get a high score about 1000 points and die.  Now enter "LOVEBUNDLE"
    for your name on the high score table.  After you press 'RETURN' a
    Message will apear letting you know the cheat mode is activated.
    Now press 'RETURN' again and delete a letter from the word
    "LOVEBUNDLE" and press 'RETURN' again.  Next press 'SPACE' to
    restart the game.  When the game starts press 'P' to pause the
    game.  Now press 'F10' (do not hold it) and enter the following
    sequence:

            "XR4IMEGATURBONUTTERTWATTINGBASTARD-OVERTOYOUDAVE"

    Once you press the last 'E' the game will start to load.  You will
    now appear on level 2 with infinite lives and all the weapons.  If
    the game unpauses while you are typing the last sequence in pause
    the game and retype it.  The dash is on the main keyboard.  If you

       of the other function keys do stuff, but nothing that will help you.

       mouse button and press 'F1'.  This will end the game and bring you

  BANE OF THE COSMIC FORGE:

      The password to enter the door in the SE tower of the 1st level is
      "SNOOPCHERI". Use the rotten cheese on the mousehole. Some small
      help for playing the game successfully: When you create your
      characters, it may be a good idea just to make all of them Dracons.

      This is untested, but unless you have at least one of this fire
      breathing race you surely wont survive the game. So maybe it would
      be good to have more. Use a good mix of the classes, try to take
      one of each spell class and a good solid thief that is at full
      strength. Get a good enough thief and you dont need a fighter. It
      may be slow, but keep rolling till you get the best character
      possible. Be sure to make at least one character female, there are
      places in the game where this is a must. Don't do it and be sorry
      later! Diversify your skills.

      Have each character specialise in a few skills relative to his
      class. Do not worry about developing weapons skills, you have no
      use for them if you created your party correctly. In fights early
      in the game use DRACONS BREATH ATTACK, just be careful not to over
      extend yourself. Rest after each encounter, backing up your hard
      work. Always search the area after a combat. Search each square
      you step in. Not only this, but search facing all four directions,
      many things can only be found that way. Thieves are not always
      true. If you find a lock and have your thief open it, allways
      guess it is poison unless you are 100% sure (I.E. tried it before)
      because it is better to suffer something else than to die by
      getting this wrong. Don't bash doors early in the game! If your
      characters are not very strong you will be sorry. Jammed doors do
      you no good, as you might never be able to open them again. Same
      goes for picking the lock. Wait till you get a caster capable of
      conjuring knock knock with at least 18 points (prefereably 24) and
      do it this way. It is much more sure. Once you know there are
      secret panels or buttons, keep walking past them until you
      discover them. You can find them by looking at the maps and know
      where they are, sometimes it takes awhile to sense them.

BATTLE ISLE:

    It has eluded most players on how to play against the computer.
    I'm sure it is buried somewhere in the long documentation file.
    The game defaults to a two player mode. Select options with the

    is the first level of the two player codes. Type in conra or code
    for any other game level that you wish to play. Then select exit to
    play the game. Here are the level codes:

BIO CHALLENGE:

    During play, press 'ESC' to pause the game and press 'G'. This
    will take you to the end of the level guardian.

    LEVEL 1: Get the green armous as soon as possible. If you have all
          of the amulet, don't go to the sphere unless you have
          collected at least four lots of monster remains, you'll
          need them to battle the end of level guardian. He's a
          bit soft in the head, so time your jumps carefully, and
          hit him there.

    LEVEL 2: There are four planets to visit, go to everyone if you
          want to get maximum points. Again, the green armour is
          very useful, so get it as quickly as possible. There's

loads of ammo for the guardian of this level,
unfortunetly that means there's loads of monsters to deal
with. The back of the guardians head is the weak spot.

LEVEL 3: Stand on the slabs and summersault. There are six
planets here, and the transporters are more difficult to
so, so you have to watch more carefully.

BRIDES OF DRACULA:

    When you're Dracula, go right from the first screen and turn the
    first two women into vampires, taking them back to their coffins.
    Then return to that screen again, walk between the lift and the
    second table and crouch down just past the skulls on the floor. A
    vampire should then appear ready to be put into her coffin. Do
    this again and again to get all eleven vampires, and then polish
