DEFLEKTOR:

1.19 274

DELUXE GALAGA (Ver 2.3 & 2.4): (Sean Courtney)

If you die during a warp malfunction, the game skips the tax-free shop and the next level. You can use this to your advantage in the harder levels, especially in the Big Trouble stages. So make sure you have plenty of lives left. When you get to the level you want to skip, especially Big Trouble, just pray for a warp malfunction! If you get a warp malfunction, just kill yourself once (It's a good idea not to do this until there's only one alien left on the screen).

(OTHER HINTS)

1. It is generally not a good idea to spend any credits until you have 500. When you get 500 credits, buy the Super Weapon.
 2. If you hold down the fire button (make sure to disable autofire if you have it on) from the moment you grab the Meteor Storm icon right up to the end of the Meteor Storm, you will get the secret \$5000 bonus (This only works in version 2.4 and possibly the upcoming 2.5).
 3. On Version 2.4, it is not a good idea to buy the \$3000 weapon until you're in levels 51-75.
 4. The weapons that cost \$750 and higher are generally not very handy unless you have autofire (Ver 2.4). If you do have autofire and have one of these weapons, what you have is an incredibly nasty weapon!
 5. You can also "cheat" by using a hex editor and editing the main program. Just find the part of the code that lists all the prices in the tax-free shop (make sure they are not part of the menu, if you modify the menu in any way the game won't run!) and change the numbers to whatever you want. This way, you can
-

make everything cost nothing if you want! However, you'll still need \$50 to enter the shop, and \$400 for continues (or \$200, in version 2.3).

(GAME SECRETS)

01. Catching a skull will add to the chances that extra life and cash multiplier bonuses appear.
02. By shooting the hurry-up ship, you can collect the rank marking that you are missing.
03. When a smart bomb have exploded and the gems are falling. You can collect them by holding down the joystick.
04. If you have a multiply when entering the meteor-storm, you may get alot of points.
05. Catching a warp icon in an alien stage with a bonus level will give you a perfect score.
06. Red, Green and Blue skulls will give you a very good weapon. Full fire power and the best ship speed.
07. When a hurry-up ship have appeared 8 times. A money ship will appear. Shooting this ship can give you alot of money.
08. If you have a weapon type, and catch the same weapon, you will get more firepower.
09. Completing the Meteor-storm will give you 100,000 points and 1,000 in cash. And if you ... hmmm. He He..
10. You can figure out what skull you have not taken by looking at the colour of the meteors in the meteor storm.
11. If you have caught 2 aliens and the scope is active. You can get alot of points by the aliens off the screen.
12. If you have the rank of Admiral and you buy more rank markings, you will get 1,000,000.
13. Having a multiply active when completing the game will give you alot of points.
14. If you have all the rank markings for a new rank, and then buy more rank markings, you will instead buy a new rank.

DETROIT (ECS & AGA): (Terry Wood)

If you want to be sure to earn a profit in your first month of DETROIT, you can plug the following number values into the appropriate places in the tutorial (see "Technical Supplement and Tutorial" booklet). They will guarantee you a reasonable return for at least your first few months in business. The first set of values gives you hints, the second set gives you decent, but not optimal exact numbers, and the third set gives you the absolute best numbers.

Important Tutorial Change: When you first start the game, you will now see a difficulty panel appear with possible settings. The toughest setting is LOAN, where your company starts off in debt to the bank, with no capital funds. The easier the setting you choose, the more money your company will have as a beginning stake. In order for these numbers to work in the tutorial, set the difficulty level as medium.
