1.26 428

GLOBULUS:

To activate the cheat mode type "Zvmo!EG" as a password. Type exactly as shown.

The most important thing to remember is that all the puzzles can be solved without losing a life, so if you lose a life and think its the only way to solve the screen, look closely. Some of the puzzles get pretty obscure after level 10, but once you eventually beat them you'll kick yourself for not seeing the solution earlier.

Look before you leap. Think about how the screen will look from a flipped perspective. A lot of jumps you make will be unnecessary and waste time and switches if you don't.

Make sure you have enough switches, at least 10 per screen. It is possible to get stuck on a downward slope with no way to get back up or kill yourself, and the only way out is to press 'ESC' and start the whole game over.

1.27 429

*GLOOM: (Michael Robinson)

On disk 2 of gloom in the dir 'misc' there is a file named 'script'. Use a XPK decruncher or Crunchmania to decompress this file. Now

load the file into a text editor and you will be able to edit the script to start at any level. Now save the script and recrunch it with Crunchmania or a XPK packer that supports Crunchmania. I used XFDcruncher/decruncher, which is available on Aminet.

1.28 430

GOAL:

If one player is sent off, press the 'AMIGA' key to bring up the substitute screen. Click on a substitute and then on the player just sent off. Exit, and you'll notice that a sub comes out, but no one comes off.

*GODFATHER, THE:

Pause the game with the 'HELP' key, then type "PIZZA HUT". This will give you infinite energy.

1.31 433

GODS:

On level two, buy a shield and a magic potion, then get three fireballs and three stars. Spend all of your remaining money on food and health. Collect all the gems in the usual manner, then get a key and make for the exit. Now comes the tricky bit. When you descend the last ladder, two thieves will appear. Make sure that you don't quite have enough energy to survive a direct contact! Before going down the ladder, release your magic potion, then climbdown and open the door. Stand in front of the door ready to leave, but don't push up yet! Wait until the thieves jump down at you and as soon as they touch you push the joystick up. You may loose that life, but then something rather strange will happen. The bonus will start to whiz up for quite some time, until the game starts again on world two with 28 extra men and about five million points!

1.32 434

GOLDEN AXE:

Play in one player mode but with two joysticks. When you die, press fire on the other joystick and you should receive three more lives.

When batting, to get a lot of runs press 'P' when the fielder picks up the ball to pause the game. The fielder will be frozen, but your batsmen won't. Simply waggle the joystick and your batters will run. You can now chalk up a high score. When you've had enough simply press 'P' again to unpause the game. On the main options screen, type "professional" and the message 'Professional Mode!' will appear in the upper left corner. This allows you to start in the professional league.

If you make a mistake typing select the 4th option 'Hall of Fame' and press fire to get back to the main options screen. You will now be able to re-enter the cheat.

NOTE: Only one can be active at a time.
