## 1.20 849

SENSIBLE SOCCER:

To score off a corner every time, kick the ball towards the goalie. When a forward gets hold of it, kick it across the goal mouth and use after-touch to bend it into the net. The computer never quite manages to work out what is going on until it is too late. When your match appears next on the fixtures screen, for example England (You) vs Germany (The Opposition), instead of choosing next match, click on Exit. Now choose friendly from the main menu and choose Germany as your team. Go to the Team/Formations Screen and get all the German star players on the bench, put the forward in goal, and generally mess about with the original team selection. Now start to play the game, but escape from it as soon as it begins. Return to the League/Cup games and View Opposition (Germany). Your

---

opponents team will still be mucked up. Using this cheat you should be able to win every match.

This cheat will allow you to play the game in slow motion (aka Kick Off 2). What you have to do is play a match and then make a substitution. Then when the player is walking off, press the 'ESC' key and you will quit the game. Start another match and you should notice that everything plays at slow speed, even the timer! To return to normal, make another substitution, but let it carry through.

---

## 1.21 850

---

SENSIBLE WORLD OF SOCCER:

Line up to take a shot on goal. As soon as you take the shot press the 'R' key. Keep the fire button pressed and when the screen returns the players will be frozen and the ball will not be saved.

To get a free player:

Go to transfers and offer to buy a teams first striker and substitute striker. Now set the money equal to 0, and offer your main striker, all in that order. Assuming the other club accept the bid, you will keep your main striker while acquiring the other teams main striker also. This should work for all players of the same position.

#### SHOCKWAVE:

A few hints and tips follow on how each of the four zones (armys, factorys, mines and rigs) effect the game:

MINES - Each time a mine is purchased the income you receive for each time pass doubles.

FACTORYS - The more factorys you have the faster more weapons are produced, these are essential.

RIGS - These supply you with the fuel for each mission run. The more rigs you have the greater the amount of fuel you receive for each time pass.

ARMYS - For every army unit you own, the enemy slows down. You have one army unit, for each four time passes that occur the enemy won't move for one time pass. If more than 50% of the sector is occupied by the enemy then you will lose one of your assests for each time pass that occurs. The best solution is when 30% of the sector is occupied go an attack the enemy.

SIMULCRA:

THE MOTHERSHIP: It follows you around generating meanies and can take many hits. Ram rather than shoot.

HOMING WEAPONS: Retreat as fast as possible then shot them. Most homing weapons have a limited range and can be out run.

BLITZKRIEG: The best attack is a fast one. Attack a generator by flying along power barriers at full speed. Learn to recognise the edge barriers. Barriers you can shut down never merge with the edge, and nearly always lead to a generator.

SIMCITY:

When the title screen appears, hold down the 'SHIFT' key and type "FUND". This gives you an extra 10,000 smackers. It also causes an earthquake every tenth time you do it, so do it before you start your city.

Another tip is to set the citizen's taxes to 0%. Then just before tax collection (December or November if playing at fast speed) quickly set the taxes up to 20%. Then after you collect taxes, put it back down to 0%. This way the citizens think they are not paying any taxes.

You can build land on water. Find a straight (horizontal or vertical), stretch of coastline and string a powerline along it. Next, move one square over, out into the water and string another powerline parallel to the first. Repeat as many times as you want. Then just bulldoze all the excess powerlines and you can build on

---

the new land. To make land you simply make a 3 lane highway across any water source. When you make a road by putting 3 sections of road on top of three section of road on top of three sections of road (3 by 3) you make 1 section of land in the middle.

SPACE QUEST III:

IN THE FREIGHTER:

Don't fool with the pod that you came in as it is a waste of time.

You will notice an object to the front and right of the door you came out. You cannot move it but you will need it later.

Head off to the bottom of the screen and then go towards the right on the next screen. You will see a machine bringing scrap towards the ceiling. Hop on and wait. After it dumps you, type "STAND" and then type "JUMP". You will be on a cross beam. Go towards the left until you reach the control room. "CLIMB DOWN" onto the grabber and go around the control room. At the screen after the control room screen, stop the grabber and push the button to lower the claw. Pick up the warp motivator with the claw and after it get back to the grabber go to the right. After you go around the turn stop the grabber and lower the claw. You will have to put the warp motivator in the hole in the top of the ship. Ride back to the control room get off the grabber and fall down the chute.

At the bottom of the chute go to the left where the wire goes into the wall and get the reactor. Climb out using the ladder and head towards the top of the screen. you are now back where you started. Go to the right and go into the tunnel. As you pass thru the tunnel a rat will grab the reactor from you. Go back to the room where you got the reactor and get it again. When you climb out again, take the ladder. Now when you go through the tunnel take the wires and continue thru the tunnel.

Go to the large head and climb in the eye. Go to the ship and use the ladder to get on top and open the hatch and enter the ship. Put the reactor in the hole to the left and then use the wires to splice them together. Get in the cockpit and examine controls. Turn on the engine, turn on the radar, take off, use your front shields and blast your way out.

IN SPACE:

Scan the area. Don't bother with monolith burger or the volcanic world but go to the other one (sorry i forgot its name). Land and go to the tourist trap and enter the building.

---

Examine the postcards as there are interesting facts you need here. Sell your gem. Buy thermal underwear and a hat if you want it. As you leave you will meet a baddie who is out to get you. Don't go to your ship! Instead go to the left of the robot and take the elevator up. When the baddie follows, wait till he is near the gears and then grab the pulley. After he becomes burger go down and get his belt. Leave and go back to your ship and go to the volcano planet.

#### VOLCANO PLANET:

Put on you underwear and go to the left and wait until the survey team leaves. Get a detonator and the pole. Go in the direction that the survey team left and go up the mountain and drop the detonator in the machine in the crater. When you get to the crossing back to your ship, use the pole and jump the gully. Take off and go to pestulon.

#### PESTULON:

Use the belt and get inside past the guards. Go to the broom closet and change into the janitor's closet. Enter the accounting area and use the vaporizer on every trashcan you come to. Make your way to the picture of elmo and take it to the copy machine and make a copy. Put the picture back and make your way thru the accounting area to elmos office. After doing elmo's trash, leave and go to the balcony. When you come back, elmo will be gone and get the keycard off of his desk. Make your way back to the corridor and on the security door use the keycard and then the picture. When you see the jello mold people, push the ramp button and then vaporize the jello.

#### THE ROBOT FIGHT:

Just do your best, no tricks here.

#### THE SPACE BATTLE:
