```
*****
Due to lack of interest on my part, this will be my final release of
Sweet Cheater. If anyone is interested in continuing the list, I will
gladly forward all new cheats that I come across to you. Since my new
passion is writing hard drive installers, I don't have the time to put
into the cheat list.
*****
```

This cheat list contains well over 1000 cheats, hints, and level codes for the Amiga and CD³². The game titles with my name after them are the ones that I have found. I have put quite a bit of time into finding some of these cheats, so if you add any to your list all I ask is that you give me credit. If you upload the list to a bbs or include it on a compilation disk please do not remove or alter the header.

All the games with an asterick (*) in front of them have been verified. If the game has been verified and has more than one cheat, the cheat right after the game title is the one that has been verified, but in some cases all the cheats may work.

Some of the cheats may have changed throughout the list due to the fact that I have verified a lot of them and made corrections when needed. If a cheat didn't work before you may want to look at the cheat again, it may have been fixed. I try to verify as many as I can, but I don't have most of the games. I won't verify a cheat with an * unless I have personally tested it and found that the cheat works.
