Thank you for taking a look at **Voodoo Doll**. I think you will find it to be a useless piece of software. But then again, it gives you something to do with your time. And if you have enemies, or you want to win the lottery, it may work. If it doesn't, delete it.

I hope you enjoy **Voodoo Doll**. If you do enjoy it and decide to keep it, please remember to **register** your copy with me. *That way I can send you timely updates and software changes.* Just print out the **orderfrm.wri** file, fill it out and send to the address shown. Checks or Money Orders are accepted. The only thing you will get in return for your \$5 is pride of ownership and piece of mind that I won't use *my* voodoo doll on you.

Please inform me of any bugs or hardware or software conflicts you find in Voodoo Doll. I would appreciate it. Tips and suggestions would also be appreciated. Thank You.

Ian Firth
