Chapter 1

Object information file

1.1 Index of Additional Information

Our Solar System

=====

"The Digital Universe" provides detailed information on the Sun, the 9 planets, and all 61 known moons in our solar system. As well, you can read information about asteroids, comets, meteors, and the interplanetary medium (the space between the planets).

The Sun

Planets and their satellites

Asteroids

Comets

Meteors

Interplanetary medium

Hypothetical objects (things which were once thought to exist)

Earth-orbiting satellites

Spacecraft

Elsewhere

=====

Detailed information is available for all of the Messier objects, some NGC and IC objects, and several significant stars.

Deep Sky Objects

(Messier, NGC, IC objects)

Stars

1.2 Planets and their satellites

Planets and their satellites

=====

Mercury

Venus

1.3 Deep Sky Objects

Deep Sky Objects (Galaxies, Nebulae, and Clusters)

=====

M1 (NGC 1952)
- The Crab Nebula

M2 (NGC 7089)

M3 (NGC 5272)

M4 (NGC 6121)

M5 (NGC 5904)

M6 (NGC 6405)
- The Butterfly Cluster

M7 (NGC 6475)

M8 (NGC 6523)
- The Lagoon Nebula

M9 (NGC 6333)

M10 (NGC 6254)

M11 (NGC 6705)
- The Wild Duck Cluster

M12 (NGC 6218)

M13 (NGC 6205)
- The Keystone Cluster

M14 (NGC 6402)

M15 (NGC 7078)

M16 (NGC 6611)
- The Eagle Nebula

M17 (NGC 6618)
- The Swan, Omega, or Horseshoe Nebula

M18 (NGC 6613)

M19 (NGC 6273)

M20 (NGC 6514)
- The Trifid Nebula

M21 (NGC 6531)

M22 (NGC 6656)

M23 (NGC 6494)

M24 (NGC 6603)

M25 (IC 4725)

M26 (NGC 6694)

M27 (NGC 6853)
- The Dumbbell Nebula

M28 (NGC 6626)

M29 (NGC 6913)

M30 (NGC 7099)

M31 (NGC 224)
- The Andromeda Galaxy

M32 (NGC 221)

M33 (NGC 598)
- The Pinwheel Galaxy

M34 (NGC 1039)

M35 (NGC 2168)

M36 (NGC 1960)

M37 (NGC 2099)

M38 (NGC 1912)

M39 (NGC 7092)

M40
- Double star, SAO 28353 & SAO 28355

M41 (NGC 2287)

M42 (NGC 1976)
- The Great Orion Nebula

M43 (NGC 1982)

M44 (NGC 2632)
- Praesepe, or the Beehive Cluster

M45
- The Pleiades

M46 (NGC 2437)

M47 (NGC 2422)

M48 (NGC 2548)

M49 (NGC 4472)

M50 (NGC 2323)

M51 (NGC 5194)
- The Whirlpool Galaxy

M52 (NGC 7654)

M53 (NGC 5024)

M54 (NGC 6715)

M55 (NGC 6809)

M56 (NGC 6779)

M57 (NGC 6720)

- The Ring Nebula

M58 (NGC 4579)

M59 (NGC 4621)

M60 (NGC 4649)

M61 (NGC 4303)

M62 (NGC 6266)

M63 (NGC 5055)

- The Sunflower Galaxy

M64 (NGC 4826)

- The Black Eye Galaxy

M65 (NGC 3623)

M66 (NGC 3627)

M67 (NGC 2682)

M68 (NGC 4590)

M69 (NGC 6637)

M70 (NGC 6681)

M71 (NGC 6838)

M72 (NGC 6981)

M73 (NGC 6994)

M74 (NGC 628)

M75 (NGC 6864)

M76 (NGC 650)

- The Little Dumbbell, Barbell, or Cork Nebula

M77 (NGC 1068)

M78 (NGC 2068)

M79 (NGC 1904)

M80 (NGC 6093)

M81 (NGC 3031)

- Bode's Nebula

M82 (NGC 3034)

M83 (NGC 5236)

M84 (NGC 4374)

M85 (NGC 4382)

M86 (NGC 4406)

M87 (NGC 4486)

M88 (NGC 4501)

M89 (NGC 4552)

M90 (NGC 4569)

M91 (NGC 4548)

M92 (NGC 6341)

M93 (NGC 2447)

M94 (NGC 4736)

M95 (NGC 3351)

M96 (NGC 3368)

M97 (NGC 3587)
- The Owl Nebula

M98 (NGC 4192)

M99 (NGC 4254)

M100 (NGC 4321)

M101 (NGC 5457)

M102 (NGC 5457)
- Messier's Error - duplicate entry of M101

M103 (NGC 581)

M104 (NGC 4594)
- The Sombrero Galaxy

M105 (NGC 3379)

M106 (NGC 4258)

M107 (NGC 6171)

M108 (NGC 3556)

M109 (NGC 3992)

M110 (NGC 205)

1.5 Earth-orbiting satellites

For information on interplanetary spacecraft, [click here](#).

Earth-orbiting satellites

Though there are literally thousands of satellites in orbit around the Earth, descriptions of only a few hundred are provided with "The Digital Universe". Most of the objects presented here are reasonably well-suited for visual or binocular observation.

1.120 M42, NGC 1976, The Great Orion Nebula

[View Picture](#)

Discoverer.....Nicholas Peiresc, 1611
 Distance.....1700 light years
 True diameter.....30 light years

M42, or the Great Orion Nebula, is one of the most spectacular and interesting objects in the sky. Plainly visible even to the naked eye, it may be observed in binoculars as a faint mist near four stars known as "The Trapezium", or Theta 1 Orionis. Small telescopes reveal this mist to be greenish in color. A larger telescope (and particularly, long exposure photography) allows the observer to view detail unmatched by any other deep sky object in the heavens. Best observations are done with low power, wide field eyepieces.

Since the Orion Nebula is so obvious to all but the most casual observers, it is surprising that the first mention of it did not occur until 1611. In 1880, M42 became the first nebula to be photographed, when it was captured by Henry Draper with an 11 inch telescope, and an exposure time of 51 minutes.

The nebula itself consists of an extremely tenuous cloud of gas and dust. It has a density a million times smaller than that of a good laboratory vacuum, yet its massive size contains enough material to form 10,000 stars like the Sun. In fact, stellar formation is occurring within the nebula, as the cloud condenses into "pockets" which eventually become dense and hot enough for nuclear fusion to initiate.

The composition of the Orion nebula is believed to be as follows:

Element	Concentration (atoms per cubic metre)
-----	-----
Hydrogen	880,000,000
Helium	88,000,000
Carbon	530,000
Oxygen	220,000
Nitrogen	180,000
Sulphur	32,000
Neon	8,800
Chlorine	1,800
Argon	1,300
Fluorine	110

The "Trapezium", or the multiple system of four bright stars designated as Theta 1 Orionis is estimated to be only 23,000 years old. This is one of the best indications to prove that the Orion Nebula is indeed a star forming region. In addition, photographs taken in 1947 and 1954 showed changes in the appearance of condensation regions in the nebula. These regions are suspected to be protostars still in the process of accumulating enough matter for fusion to begin.

Studies done with the 27-disk VLA (Very Large Array) radio telescope in New Mexico in 1990 have revealed the existence of bright filaments surrounding the Trapezium. Visual evidence had hinted to such structures, but they are much more obvious with the radio data. Astronomers do not yet know what they are. They may be the edges of gas 'bubbles' inflated by stellar winds. Other possibilities include their being condensations of cooling interstellar gas, or regions where expanding gas bubbles encounter abrupt changes in the density of the interstellar medium.

In 1994, C. Robert O'Dell (Rice University) and Zheng Wen (University of Kentucky) used the

Hubble Space Telescope

to study stars near the Trapezium to

see if they could detect any disks of gas and dust surrounding them (thought to be planetary systems in the making). They were surprised to find that 56 of the 110 stars they surveyed had such disks. Because the stars are so young, the disks have not yet had time to condense into planets, however the data indicates that planetary formation may be a common occurrence in the universe.

More than 50 variable stars have been detected in M42. One of the most interesting is designated as "T Orionis". This irregular variable 5.2 arcminutes south and 9 arcminutes east of the Trapezium stays at a magnitude of about 9.4 for several months. Then, it rapidly and unpredictably fluctuates in brightness, on occasion becoming as dim as magnitude 12.6. Astronomers are not sure what causes these variations.

As a whole, M42 is moving away from us at a rate of about 30 km/sec, although the cloud is quite turbulent, and different portions are receding at different rates. In addition, it is measured to be expanding at the rate of about 10 km/sec in the inner regions and 7 km/sec in the outer.

There is some evidence to suggest the existence of a black hole in the Orion nebula. Strong X-rays from a source designated 2U0525-06 (near Theta 2 Orionis) were detected in 1976.

In 1992, C. Robert O'Dell of Rice University used the Hubble Space Telescope to identify 15 disks of gas and dust surrounding newly formed stars. These disks are believed to contain a mass 15 times greater than that of Jupiter, and it is thought that they may condense into planets in the future. Based on his data, O'Dell believes that up to 40% of the newly formed stars in the Orion nebula may be surrounded by these 'protoplanetary' disks.

View Picture

Discoverer.....P. Mechain, 1780
Distance.....1,600 light years
True diameter.....3 light years

M78 is a diffuse nebula, visible in small telescopes as a faint patch of light. It is one of the brighter portions of a huge nebula covering much of the constellation of Orion. Very little detail can be seen, even with larger instruments.

Two stars of 10th magnitude and spectral type B are found within the nebula.

1.188 IC 434 - Background illumination for the Horsehead Nebula

View Picture

Discoverer.....E. Pickering, 1889

Distance.....1,500 light years

True diameter.....26 light years

The Horsehead Nebula is probably one of the most famous nebulae in the sky. This fame is brought about by its spectacular appearance in long exposure photographs of the region. Unfortunately, a very large telescope is required to see the nebula if photography is not used.

The appearance of the Horsehead is made possible by two separately designated nebulae. IC 434 is a bright nebula (appearing red in the picture) providing

background illumination to silhouette B33, the dark Horsehead itself.

IC 434 is believed to be illuminated by the nearby star Zeta Orionis. It is suspected that new stars are currently being formed in the nebula.

1.228 Betelgeuse

Betelgeuse (pronounced BAY-tel-jooz) is a bright red giant star in the constellation of Orion. Its name is believed to have come from the Arabic 'Beit Algueze', meaning the "Armpit of the Giant".

This star is an irregular variable, with a period roughly 5.7 years long. The star has been measured at magnitudes between 0.4 and 1.2 in recent history, but the brightness variations are quite irregular. Spectroscopic studies show that during periods of maximum brightness, the diameter of the star may actually increase to a size 60% larger than its size when faint. The star is so large that if it were to replace our Sun, it will engulf Mercury, Venus, Earth, and Mars. During periods of its maximum size, Jupiter would be in jeopardy as well.

Betelgeuse is believed to be located about 520 light years away. To shine as brightly in our skies as it does, astronomers infer that it must be 10,000 times more powerful than our Sun.

1.368 Cosmos 1943

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.369 Cosmos 1943 Rocket/Body

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.370 Cosmos 1954 Rocket/Body

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.371 Okean 1

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.372 Meteor 3-2

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.373 Feng Yun 1-A

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.374 NOAA 11

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.375 Cosmos 1980

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.376 Cosmos 1980 Rocket/Body

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.377 Lacrosse 1

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.378 Cosmos 2004

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.379 Cosmos 2004 Rocket/Body

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.380 Meteor 2-18

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.381 Cosmos 2008-2015 Rocket/Body

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.382 Delta Star

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.383 Cosmos 2016

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.384 Cosmos 2016 Rocket/Body

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.385 Cosmos 2026

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.386 Cosmos 2026 Rocket/Body

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.387 Cosmos 2027

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.388 Nadezhda 1

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.389 Cosmos 2034

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.390 Cosmos 2034 Rocket/Body

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.391 Cosmos 2037 Rocket/Body

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.392 Cosmos 2046

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.393 Intercosmos 24

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.394 Intercosmos 24 Rocket/Body

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.395 GPS 2-4 Rocket/Body

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.396 Meteor 3-3

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.397 COBE

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.398 GPS 2-5 Rocket/Body

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.399 JCSAT 2 Rocket/Body

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.400 Leasat 5 Rocket/Body

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.401 Cosmos 2056

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.402 Cosmos 2056 Rocket/Body

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.403 Spot 2

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.404 Spot 2 Rocket/Body

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.405 GPS 2-6 Rocket/Body

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.406 Cosmos 2058

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.407 MOS 1-B

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.408 Orizuru (Debut)

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.409 MOS 1-B Rocket/Body

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.410 LACE

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.411 RME

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.412 Nadezhda 2

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.413 Nadezhda 2 Rocket/Body

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.414 Okean 2

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.415 Intelsat 6-3

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.416 Cosmos 2060

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.417 Cosmos 2061

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.418 Cosmos 2061 Rocket/Body

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.419 Pegsat

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.420 Cosmos 2064-2071 Rocket/Body

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.421 Palapa 6 Rocket/Body

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.422 Cosmos 2074

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.423 Hubble Space Telescope

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.424 Cosmos 2075 Rocket/Body

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.425 Cosmos 2082

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.426 Cosmos 2082 Rocket/Body

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.427 Rosat

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.428 Rosat Rocket/Body

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.429 Cosmos 2084

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.430 Cosmos 2084 Rocket/Body

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.431 Meteor 2-19

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.432 Gamma

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.433 CRRES

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.434 Cosmos 2098 Rocket/Body

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.435 Feng Yun 1-B

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.436 Atmosphere 1 & Atmosphere 2

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.437 Atmosphere 2

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.438 Feng Yun 1-B Rocket/Body

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.439 Ulysses Rocket/Body

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.440 Inmarsat 2-1 Rocket/Body

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.441 GPS 2-10 Rocket/Body

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.

1.442 DMSP 2-5

This information is not provided with the demonstration version of "The Digital Universe". Please consult Ordering The Digital Universe for more information on how to obtain a registered version.
