

Movies Overview

- { Mars }** Learn about Mars and the events leading to today's knowledge of the Red Planet. Includes a simulated flight through the Noctis Labyrinthus region, a possibility in the next century.
- { Jupiter + Io }** Learn about Jupiter and its bizarre moon Io. Earth based observations, images received from spacecraft, and a simulated mission to Io highlight this movie.
- { Grand Tour }** Journey outwards from Earth to the edge of the Universe, viewing spectacular celestial objects along the way.
- { Moon }** Tour Lunar terrain through a simulated telescope.
- { Giza }** Learn of the great pyramids of Giza and their possible astronomical significance.
