1.3 STCCG.guide/Episodes/Movies/First Contact

When a Borg fleet enters Federation territory, one ship can break through the defenses and heads for Earth. After doing immense damage to another armada of Starfleet ships a small ship escapes into some rift, that takes them back to 2068, with the Enterprise-E behind them. Their intention: to interfere in the first contact of humans and Vulcans in the first test of Zefram Cochrane's warpp drive.
