P O W E R W I N D O W S (For Lotus 1-2-3) Version 5.3 :

Power Windows consists of a macro-driven spreadsheet named AUTO123.WK1.
When copied to the 1-2-3 program directory, it retrieves automatically
when you start the Lotus 1-2-3 program. You can copy AUTO123.WK1
to any other Lotus 1-2-3 spreadsheet subdirectories to make it more
accessible. AUTO123.WK1 does not take much disk space (about 11k).

Power Windows is compatable with Lotus 1-2-3 DOS releases 2.2 and up
and any Windows release. Power Windows will display your drives and
directories and quickly retrieve, delete, or view your spreadsheets.

1. U S I N G P O W E R W I N D O W S :

Power Windows is a macro on a spreadsheet. The macro begins immediately
when you retrieve AUTO123.WK1. If this does not occur, you should type
/ W(orksheet) G(lobal) D(efault) A(utoexec) Y(es) and retrieve it again.
Once the macro begins, you will see a display of your directory items on
the left side window and some information on the right side window.

You can navigate to other drives and directories by pressing the ENTER
key on the entry item. The entry of ".." will take you backwards in
the directory tree (unless you're at the root directory, of course).

Press the ENTER key on a spreadsheet name and the file menu will pop up.
The file menu can retrieve, delete, view, or create a blank spreadsheet.
Be careful with the delete option, there is no confirmation. The view
option will display a snapshot of the upper left corner of the
spreadsheet you chose.

     the Lotus Development Corporation.

  3. Soft Breeze makes no general or specific warranties about the
     performance of Power Windows on any particular system.
     Since Power Windows is a spreadsheet macro, the program should
     run well on all compatable releases of Lotus 1-2-3 (DOS releases
     2.2 and up and any Windows release).

  4. A trial version may be provided to all on a trial basis. The
     user should register Power Windows after a brief evaluation period.
