Welcome to Stuart2.4

Welcome to Stuart, the shareware NeXTSTEP DEC VT100 terminal emulator.   Hopefully you will enjoy using Stuart as much as I've enjoyed bringing it to you.

For installation instructions, please consult the online manual (click the **Info/Manual...** menu entry).

Stuart2.4 has a large number of improvements over Stuart2.3, too many to list here - see the Features section of the online manual.   A short list is in order, though:

· Online manual with easy navigation and searching.

· Revised Preferences and New/Preferences panels, along with a Runtime inspector panel.

- Meta support for non-QWERTY keymaps.

- Custom window titlebars can be dynamically set from the shell using xterm-style OSC sequences, or from the user interface.

- Improved file drag&drop support.

- Per-window shelves for easy access to files and directories.

- Quite a number of bug fixes (see the Fixes.rtf file).
