Author: David Rakowski

Original Author's Notes

Benjamin Caps is a TYPE ONE PostScript font that is compatible with Adobe Type Manager version 1.2 or higher, which was named after a student of mine, simply because I CAN.   It is in the Art Nouveau style, and has a wood-carved feel to it.   All 26 capital letters are in the font, and the tail of the capital 'Q' is amazingly long.

To install BenjaminCaps, install like any other PostScript font.

BenjaminCaps is © 1990 by David Rakowski, Alle Rechte Vorhalten.   It is free.   Permission is explicitly granted to distribute this font in any and all ways possible, providing all files in the original archive

are included, including this one.

Like, Benjamin Font is another one of those totally radical cool neat gnarly bite the big one thingies from the really weird but oh so hip dudes at Bug-Bytes, somewhere in the middle of Massachusetts, where they keep all the trees and where the mosquitoes for everywhere else originate.
