A note from Wave, aka Michael B. Johnson
;../Stone_Friends/Wave/Wave.rtfd;;¬

I shot these images (about 450+) at a rave in SF this summer.   My friend Andrew Stone (who put on the rave) paid me to shoot the event and put all the images on PhotoCD.   I was interested in the notion of making the images available on the net so that people could appropriate and reuse them.   Unfortunately, disc space considerations give way, so I'm making a few images available. There are two things you need to do to have me make them available to you:

(1) tell me what you want to do with the images
(2) promise to credit me as the source of the original digital image
