Stone Design Ships Create 3.1

ALBUQUERQUE, NM, March 4, 1996 - Stone Design shipped today the quad fat Create 3.1 on the STONE_CD vol. 3.

Andrew Stone, CEO of Stone Design remarked, "This version of Create is the best ever! It has many requested features and bug fixes that make Create the finest drawing application in the NEXTSTEP market, hands down."

Create 3.1 incorporates numerous new features, including, but not limited to:

GENERAL:

- ✓ **Selection_Status;**↵QUAD Fat Architecture: runs on Motorola, Intel, HP and SPARC architectures
- ✓ Selection_Status;↵Autotracing to convert TIFFs to editable graphics.
- ✓ Selection_Status;↵Support for layers on each page.
- ✓ Selection_Status;↵Background graphic on each page.
- ✓ Selection_Status;↵More art galleries for shared access to clip art.
- ✓ Selection_Status;↵Template files and directories for stationary, forms, etc.
- ✓ Selection_Status;↵Expanded, updated on-line manual.
- ✓ Selection_Status;↵Colorful interface.

EXPORT, EMBEDDING and LINKS:

- ✓ Selection_Status;↵EPS exported by Create remains editable by Create.
- ✓ Selection_Status;↵OOE Level 2 allows embedding Create docs into OpenWrite.
- ✓ Selection_Status;↵Filter program allows dropping of Create docs into other apps.
- ✓ Selection_Status;↵Total control over exported TIFFS: bitdepth, compression, etc.
- ✓ Selection_Status;↵True object links with no redundant storage.

MAIL:

- ✓ Selection_Status;↵Prepare for Mailing to enfold links.
- ✓ Selection_Status;↵Allow alternate email support addresses.
- ✓ Selection_Status;↵Allow alternate Mailer to be used.

TEXT:

- ✓ Selection_Status;¬ Support for 2-byte fonts, like Kai-Su.
- ✓ Selection_Status;¬ Convert Super Text to Paragraph Text and vice versa.
- ✓ Selection_Status;¬ Text can be automatically "boxed".

DESIGN:

- ✓ Selection_Status;¬ Layout Guides for easy placement of objects.
- ✓ Selection_Status;¬ Your custom zooms are remembered and available for all docs.
- ✓ Selection_Status;¬ Zooming is much faster.
- ✓ Selection_Status;¬ You can zoom in on an area with CONTROL-SHIFT drag.
- ✓ Selection_Status;¬ Multiple objects can receive the same pattern easily.
- ✓ Selection_Status;¬ Predefine your default colors of object's effects.
- ✓ Selection_Status;¬ Composite masks formed from groups.
- ✓ Selection_Status;¬ Reverse path of splines and polylines.
- ✓ Selection_Status;¬ Objects can be "unscaled".

Create is *THE* fully supported drawing application for NEXTSTEP. Create is a multi-page, full color, easy and fun to use graphics program that is perfect for professional artists and non-artists alike. Create's tool palette is highly extensive, including arcs, circles, lines, curves, splines, ovals, rectangles, squares, text, super text, and freehand tools. Create's User PostScript is unique, and perfect for advanced users or users who would like to learn more about PostScript, view, directly edit and repeatedly execute the PostScript code associated with any object created in or imported into the program.
