What they do,
What you do,
Do da do.

Welcome to Chapter One

Welcome to chapter one. We're glad you made it. This chapter is here to give you an overview of the docs, utilities and to give you a good understanding of how gravity works, and the meaning of our lowly existance on the planet Zimiza-Zimizay.

RUN — Realmz Utilities NINE

If you haven't figured out yet, these utilities all affect your character files. So, if you want to be safe, make a duplicate copy, put it on a disk, and forget where you put the disk. Seriously though, if you alter your precious characters, a backup would be nice to have.

Logically Illogical Numerization

Unfortunately, the docs are Logically Illogical Numerized, which means that the utilities are not in the order that they are numbered. The docs start with utility 9 (or something like that). This is because I forget what the individual utilities are numbered as. Hey, I'm human too.
