

Maps

From time to time in the adventure you will come into possession of maps. The names of all maps possessed by the party are displayed under the 'Maps/Notes' menu. To view the map, select the name of the map from the menu. While the map is displayed, the X and Y location of the top left hand corner of the map is displayed in red in the fatigue bar. If the party is located anywhere on the current map, their location will be displayed as well.

Note Keeper

The first item under the 'Maps/Notes' menu is Note Keeper. The Note Keeper is a way for you to jot down notes about various things and leave them in the area. When you leave a note a little note will appear on the ground. To view what you have written at a later time, simply move on top of the note and select Note Keeper from the menu again. The old note will be redisplayed.
