

MacSyndicate is an excellent game produced by Bullfrog Productions LTD. In my opinion, it is one the best Mac games ever produced. In the game you control up to four "syndicates" to complete missions to save the New World Order. Missions include assassinations, demolitions, kidnappings, hardware aquisitions, and many others.

To complete these missions you navigate your syndicates using different weapons and devices. Many times there will be obstacles, criminals, and enemy syndicates in your way. You will eliminate these obstacles to finish the mission.

**This is the "UNOFFICIAL" Syndicate Faq's and Strategy Sheet for Demo or full game users.** All references to Syndicate, MacSyndicate and related material are trademarks of Bullfrog Productions LTD. I make no warranty whatsoever in your usage of this Faq sheet. Use this faq sheet and the information within at YOUR OWN RISK. This faq sheet is provide free of charge and any contributions or royalties you would like to make should go to Bullfrog Productions LTD. If you have downloaded the demo, this faq sheet should convince you to go purchase the full version!!! Please all demo users: purchase this game immediately!!! This will hopefully convince Bullfrog and many other software developers to bring new and exciting games to the Macintosh platform!!!
