

Other Settings:

o background processes:

If you check this box you give no time to other applications. If another program makes trouble - don't give time to it.

And Galaxus is (a little bit) faster...

WARNING: Your Mac may crash when you check this option!!! In Galaxus 1.0.5 this option is not longer possible in the same way as before....

Change automatically to 256 colors:

If your standard color setting is not 256 colors an ugly dialog warns you to change colors to 256. You can let Galaxus change automatically. When you quit the old color setting is used.

Warning Dialog if you quit.

When you quit a dialog asks you if you really want to quit. You can disable it.
