

A-10 Attack! 1.1 Update Notes.

Please Read the Following message before you install or
Update from
A-10 Attack! 1.0

IMPORTANT!

If you are updating your original version of A-10 Attack! 1.0 with this Update Maker, please complete the following tasks before you run the Update Maker.

Before you go ahead and update of A-10 Attack! 1.1, please reboot your Macintosh with Extensions off and please make sure that ALL VIRUS SOFTWARE is disabled. Doing this will ensure that the Update Maker will not conflict with any incompatible "inits" or Software.

Please make sure that the A-10 Attack! application Icon has the
following name:

A-10 Attack! 1.0

If you have changed the name due to a Flight stick setting file compatibility, please temporarily change the name back to **A-10 Attack! 1.0**, if the Application name is not **A-10 Attack! 1.0**, the Update Maker will not see the application to update it.

When Update Maker has finished updating your files, you can change the name back to your preferred wording.

We at ParSoft would like to thank you for taking the time to read this Update Notice and for your continued support.
