 CHAPTER *11*: What is DOOM add-on software and where can I get it?
 ==============================================================

          DOOM add-on software is software, not made by id Software, that
 modifies, changes, or helps you with your game when playing DOOM.
 Some
 examples are cheating utilities, map editors, and sound editors.   This
 software is in no way endorsed by id, and neither id Software nor myself
 take any responsibility for any problems you have with this software.   DO
 NOT contact id regarding any of this software.   Most of this software will
 not work on the shareware version of DOOM, by request from id Software.
 Most of this software is available from these sites unless specified
 otherwise.
