

he MacSense CD features an expanded edition of each month's MacSense. In addition to new features not offered in the downloadable edition of MacSense, the magazine is supplemented with video and audio interviews, QuickTime demonstrations and many more images! Hear industry leaders speak. Let our review supplements show you how applications work. Browse through libraries of addenda to our articles. Experience a Macintosh magazine like never before!

Accompanying the CD magazine is a vast shareware library, numerous commercial demos and much-sought after utility updaters. Why spend three or four hours downloading the latest and greatest software demos, racking up your online bills, when you can get them monthly from the MacSense CD? The MacSense CD will bring you everything you need—or could dream of needing—on one, monthly CD-ROM.

In addition to receiving a 12-month, 10-issue subscription to the CD-ROM publication, MacSense CD subscribers will also be kept up to date with the very latest happenings in the Mac industry via a complimentary subscription to MacSense HotBits!

The MacSense CD now retails for a low \$49 US (\$69 Cdn; includes GST/\$69 US for overseas orders) for a 12-month, 10-issue subscription. January-February and August-September will be combined issues.

What can you expect to find on the MacSense CD? Here's a sampling of the cool content on our All-Request August/September CD:

AS REQUESTED: Apple television commercial showcase. MacSense serves up eleven of Apple's best television commercials, including the famous "1984" advertisement.

AS REQUESTED: Apple's Mac OS 8 Tour. MacSense presents Apple's own multimedia walk through the future of the Macintosh operating system.

AS REQUESTED: System 7.5 Update 2.0 (both English American and French Canadian); Mac OS 7.5.3 Revision 2.

AudioBit interview with Bob Filice, Apple's System 7.5 Update 2.0 Product Manager. Bob offers advice on how to best install the Update — and spills the beans about a possible interim system software release before the shipment of Mac OS 8

VideoBit interview with Alex Seropian of Bungie Software. Alex tells MacSense about Bungie's plans for expansion and offers his views on the Mac gaming industry.

VideoBit How-to: Using Find File effectively. Many people give up their search for lost files if they cannot remember the file name (or a component of it). This MacSense VideoBit shows you how to get the most from Apple's find file

VideoBit How-to: Simplifying batch printing. The tedium of a day at the office can be compounded by the demand of batch printing. If you use LaserWriter 8.3, however, you can save yourself some precious time. This VideoBit will show you how.

A complete library of MacSense freezine back issues.

And, of course, spoken columns, multimedia commentaries for reviews, software updates, demos, a vast shareware library—and a few hidden easter eggs, too!

acSense Communications is very pleased to begin offering the MacSense HotBits personal delivery service! If you just can't wait for the latest Macintosh industry news, MacSense HotBits is for you. Each and every time we post a new news story to the MacSense HotBits forum of the MacSense Online web site, we'll whisk off a text copy of the article to your email box! There's no need to dial up our web site; when important news happens, you'll be one of the first to know.

A 12-month subscription to MacSense HotBits is just \$19 US (\$24 Cdn+GST).

o take advantage of our special offers, customers in the United States and Canada can call 1-800-439-7555 with their Visa or MasterCard handy.
