

# JPEGCompress 2.5

Copyright 2001-2005 Dreamscape Software

## **What is JPEGCompress?**

JPEGCompress is a graphics application designed to help you easily compress images with the JPEG compression format for fast delivery over the Internet.

## **What is different about JPEGCompress?**

JPEGCompress differs from its competitors in that it shows you what your image will look like as it's being compressed. That way, you can choose how the image will look even before you decide to save it.

## **What else can JPEGCompress do?**

JPEGCompress will allow you to Resize an image, and even change its perspective either horizontally or vertically.

JPEGCompress also gives you the ability to export an image into another format to help fit your needs. These formats are PNG, GIF, PBM and BMP (Windows Bitmap). With Apple QuickTime installed, you will also be able to export Adobe Photoshop, MacPaint, PICT, QuickTime, SGI, TIFF and Truevision TGA images.

Wizards have also been implemented into JPEGCompress. These wizards will guide you through processes that may be too complex for some users.

## **How much does JPEGCompress cost?**

JPEGCompress is free of charge for any and all usage. You are, however, required to abide by the JPEGCompress Distribution and License Agreement at the bottom of this page.

## **How can I contact Dreamscape Software for Questions, Comments or Support?**

You can contact Dreamscape Software at any time by visiting the Support section of the Dreamscape Software web site at <http://www.dreamscapesoftware.com/support/>

## **What's new in this release?**

The following list contains all changes to JPEGCompress since version 2.0.1.

### *New Additions...*

- Added "Drag & Drop" support.
- Added "Quick Tips" that can be turned off.
- Added the ability to contact Support.
- Added the ability to set an image as the Desktop Wallpaper.
- Added the ability to Print and image.
- Added the "Batch Process" wizard.

### *Bug Fixes...*

- Fixed the "Disappearing Window" bug.
- Fixed the "Maximized Window" bug.
- Fixed the "Scrollbars Always Visible" bug.

### *Supported Image Formats...*

- JPEGCompress can now natively export 24-bit Windows Bitmaps.
- JPEGCompress can now open and export Adobe Photoshop, MacPaint, PICT, QuickTime, SGI, TIFF and Truevision TGA images if Apple QuickTime is installed.

### *Resize Image...*

- Width/Height calculations are now done on-the-fly while typing.
- Removed multiple text boxes and remodeled dialog.

### *Send To...*

- Added the "Send to Mail Recipient" wizard.
- Added the "Send to FTP Server" wizard.
- Added the ability to send a copy of the compressed image to the Desktop, My Documents or My Pictures folders.

### *Preferences...*

- Added the ability to set File Type Associations.
- Changed "Compatibility Options" to "Performance".
- Default quality levels can now be re-applied.
- Added the ability to turn off Errors during Batch Processing.
- Added the ability to specify a "Default Folder" for saving/exporting images.

### *Help Topics...*

- Replaced existing "Help Topics" with an HTML Help version.
- Placed the "Help Topics" on the JPEGCompress web site.

### *Setup*

- Added Integration Options for Internet Explorer 4.0 or higher.
- Added the ability to automatically associate images with JPEGCompress.

## **JPEGCompress Distribution and License Agreement**
