1.5 Note well...

Note 3:

In the DOS_Comments of each file, you may find several informations:

(Actually, the DOS_Comments are not present anymore physically on the CDs, but they are all stated in the various Module Lists, obviously!)

At first, the duration of the tune (ex: - [05:34] -)

Then, if the module was converted to Protracker (with Pro-Wizard), you'll find the Original Format in parentheses like : (P61A)

Then, there may be this : /Group

It means that the author was in THAT group when he composed this module (it may not always be his current group).

Then, there is often the Composing Date stated,

the origin of the tune (which demo, mag, music-disk...), or the Demo-Party which the tune was presented for, etc...

I always try to state as much data as possible, for your pleasure ;) and for the Respect of the Composers !

1.6 Last statement...

Please contact me if you know some informations that I miss concerning the Composers' real names and/or country, also if you noticed some mistakes in this list. Thanks!

And of course if you have some mods that could complete my collection ;) ...some mods from famous composers, above all...
