==> 399319 Blocks, 202,985,153 Bytes used in 53 dirs, <1458> modules.

Note: In these dirs you will find quite old mods from good ol' groups like Cryptoburners, Kefrens, Rebels, Scoopex, Wild Copper... as well as very recent ones (often PC groups) like Cadence, Carcass, Force Ten, Mistery, pHluid and Playmobil (Hi Snese! :)

Also note that, for example, in the Kefrens directory, you will find all tunes from Kefrens Megademo 8 (hey, hey, remember! ;), and you'll notice that some ones were composed by Jesper Kyd, Blaizer, Maestro, or SLL, -BUT- they are not present in Z2:Jesp_Kyd, Z1:Blaizer etc... This is simply because I wanted to keep all the "MD8" tunes together, so that you can listen to all tunes without changing directories...

Note: If you want to group together all mods composed by Maestro, just use MAfind and search for "Maestro" through the whole ModList. :)
