Note: As the title says, you will find here the mods composed by 'various' composers only. Refer to the "Authors.\*" directories on CD-1/2/3 and "Groups" directory on CD-3 for the other ones. (e.g. a module composed by Necros for The Party 5 will not be there, but in "MAZ2:Necros").

Or just use MAfind and search for "The Party" or "Gathering", etc.. ;) )

Note: In each of these directories, you will find some text'n guide files. These are the Result-Files from these Compos or Contests.

Here I must thank the persons in charge of the RAW-online Web Page (i.e. <<http://www.xs4all.nl/~blahh>>) because most of these files come from there.

Note: These are not the ONLY oldies included in this Collection!  
 You will be able to find some -great- other ones in the MAZ4: dirs,  
 (standing for the mods sorted by Groups, on CD-3) like:

|               |               |               |
|---------------|---------------|---------------|
| MAZ4:Alcatraz | MAZ4:BeastieB | MAZ4:Brainsto |
| MAZ4:Brnstmrs | MAZ4:Crypto   | MAZ4:Deathstr |
| MAZ4:Dexion   | MAZ4:Fashion  | MAZ4:IT       |
| MAZ4:Kefrens  | MAZ4:MLP-Artw | MAZ4:Phenomen |
| MAZ4:Predator | MAZ4:Rebels   | MAZ4:Scoopex  |
| MAZ4:Silents  | MAZ4:TheGiant | MAZ4:The_Link |
| MAZ4:TJC      | MAZ4:Triangle | MAZ4:W_Copper |

Obviously, there are some essential oldies in most of the Composers' directories, but there are too many to mention :)

Simply don't forget:

- On CD-1: 4mat, Bit-Arts, Diablo, Dr.Awesome, Firefox, Fleshbrain, FRED.
- On CD-2: Glue Master, Greg, Gryzor (huhu!), Mahoney & Kaktus, Mantronix, Moby, Music-Steve, Peter Salomonsen.
- On CD-3: Reflex, Romeo Knight, SLL, Splitter, Static, TSM, Uncle Tom and Walkman (The Great!).

You may also find some rather old mods in the 'MAZ5:Misc\_Old.\*' dirs, (CD-4)

Misc\_Old.A-D

```
,
Misc_Old.E-K
,
Misc_Old.L-R
,
Misc_Old.S-Z
,
```

however not AS old AS the real oldies :) but still...

Finally, don't forget the MAZ6: dirs (CD-4), all the synthetic modules! Of course there are tons of oldies in there! Don't miss the Custom modules, Delta Music, Future Composer 1.3, Future Composer 1.4, FRED, Hippel, Hippel 7V, Hippel COSO, Mark II, Maniacs of Noise, Music Assembler, PlaySID (of course! :), SidMon, SMUS, SoundMon, Whittaker (Rhaaa, lovely!) and the only TFMX mod included (thanks to Chris Huelsbeck himself) : Turrican II Main Title (7V) !!

Hhhmmmm, oldies, oldies... maybe poor samples, but so great melodies!

[Hint: Have a look at the /Tools/Amiga directory, you will have a nice surprise, I guess...]
